Maloney Bros. & Wells Co.

Dansville, N. Y.

1912

Established 1885.

Incorporated 1911.

Capital \$60,000.00

For twenty-six years the Nursery stock sold by Maloney Bros. & Wells Co., Dansville, N. Y., has been shipped to patrons located in every State of the Union. This stock is grown from bearing orchards, on one of the most beautiful farms of 250 acres in the healthiest sections of the famous Genesee Valley, hence you run no risk in buying of us.

OUR DISPLAY OF FRUIT TREES EXHIBITED AT THE STATE HORTICULTURAL MEETING AT HARRISBURG, PA., JAN. 24, 25, 26, 1911.

Reading from right to left, the parties in illustration are: Walter E. Seeley, Nescopeck, Pa., W. J. Lewis, Pittston, Pa., C. B. Care, Linglestown, Pa., and Our Representative.

growing for twenty-six years. We grow and sell only varieties that we know will succeed in the soil and climate of your locality. Thrifty, vigorous trees with lots of good roots and matured wood, these are the kind of trees we grow and sell direct to the planter.

OUR SOIL gives them abundant nourishment without over-stimulation, and the wood is firmer than that produced on the prairie soils of the west, where they make a rank but spongy growth, and our cold but not over-severe winters mature and harden up the growth in a way impossible to southern latitudes.

THIS CATALOGUE OUR ONLY SALESMAN

In buying fruit trees, it is best to steer clear of agents, with plausible stories of wonderful quality and yield. Some nursery agents are honest and conscientious, but so many are not, that it is difficult to separate the sheep from the goats. The best way is to make your selection of varieties and send and get your trees direct from the grower, who is in a position to supply you first class trees and plants, at 50% less than the price asked by tree agents.

SHIPPING SEASON

We pack and ship all winter to Southern states, our regular Spring packing and shipping season usually opens here about the first of April, and continues into the month of May. The planting season is not regulated by any particular month or day, nor by the state of vegetation where the planting is to be done, but by the condition of the trees to be planted. Hence, trees can be sent with safety from Dansville, N. Y., to localities several degrees south, even if they do not arrive until the ordinary transplanting season in that locality is passed.

FREE BOXING AND PACKING

We box and pack all shipments without charge. All orders are put up in boxes or bales, lined with heavy paper to guard against stock drying out; the trees and plants are packed in moist excelsior and straw.

HOW BEST TO REMIT

Remit by Bank Draft, Express Money Order, Post Office Money Order, or Registered Letter. We will ship trees and plants C. O. D., providing 25% of the total of your order is sent in cash. If the order goes by express you pay the balance to your express agent upon arrival. If the order goes by freight you pay the balance at your bank, where you will also find freight bill and order on your freight agent to deliver shipment to you.

MALONEY BROS. & WELLS CO., DANSVILLE, N. Y.

TO THE PLANTER: We take pleasure in presenting this, our wholesale price list. We wish to thank our many customers for their liberal patronage in the past, and to assure them of our appreciation of their continued patronage, which we shall make every effort to merit. We have added to our already large nursery equipment, one of the largest and most up-to-date packing houses in the country, hence have the exposure of trees and plants reduced to a minimum. After digging, all the stock is immediately sent to the packing house, where it is graded, packed and handled under cover, hence customers may rely upon receiving their trees and plants in the very best condition.

TWO HUNDRED AND FIFTY ACRES. The extent of our nurseries gives us the advantage of being able to give our stock plenty of growing room, in fact, we pay particular attention to this one feature alone, as by it we are able to produce well developed trees of every variety we grow.

DANSVILLE, N. Y., is located at the head of the famous Genesee Valley, and it is conceded by all fruit growers and nurserymen that there is no place in the world more favorable for the development of sound and vigorous trees, well adapted for transplanting into every section of the country.

We have made a study of fruit-

Dansville Nurseries Free from San Jose Scale

New York State Inspector Barden unreservedly declares that Dansville is the only nursery center of any important size that is entirely free from San Jose scale; this fact is not generally known. Mr. Barden believes that Dansville Trees are worth five cents each more than the market price, as the reputation of Dansville Nurseries for freedom from San Jose scale, and general vigor of its trees and plants is worth many thousands of dollars to the planter who buys Dansville grown trees.—*Dansville Advertiser*.

STATE OF NEW YORK DEPARTMENT OF AGRICULTURE Certificate of Inspection of Nursery Stock

This is to Certify that the stock in the nursery of Maloney Bros. & Wells Co., of Dansville, County of Livingston, State of New York, was duly examined in compliance with the provisions of Section 83 of the Agricultural Law and it was found to be apparently free from any contagious or infectious disease or diseases, or the San Jose Scale or other dangerously injurious insect pest or pests. This certificate expires September 1st, 1912. Dated, Albany, N. Y., September 1st, 1911.

6 Hardy Shrubs, Special Bargain Price, \$1.00

Everybody Should Take Advantage of These Special Offers

Apples Every Day of the Year a Staple Product—Easily Handled and Preserved, for Which There is a Permanent Demand and Market

The apple has long been recognized as our National Fruit. It will thrive on nearly any well-drained soil. Its period of ripening, unlike that of other fruits, extends nearly or quite through the year. By judicious selections of summer, autumn and winter sorts, a constant succession can be easily obtained.

There is no farm crop which, on the average, will produce one-fourth as much income per acre as will a good Apple Orchard. The average price paid for the fruit is steadily on the increase, and the immense demand for home consumption, foreign shipping, canning and evaporating, assures us that it will continue to increase. We especially recommend planting late-keeping winter varieties.

If Apples are planted at the rate of 50 trees per acre, 30 feet apart each way, rows of peach trees can be planted between the Apples, which, growing more quickly than the Apple trees, soon protect them from winds, and thus prove a great benefit to them. After eight or ten years of productiveness, as the space is needed for the Apples, the peach trees may be removed leaving the orchard better for the protection, and at the same time having yielded the planter a large return for his outlay and labor.

Our list of apples consists of the following varieties, which have been well tested and can be recommended as the best in cultivation:

Select Varieties of Apples

Princess Louise. Of medium size, color mixed and striped red over a yellowish ground; fine, juicy, tender; good quality. October.

Shiawassie Beauty. Fruit of uniform size; skin yellow with attractive red splashes and striped with carmine; flesh white, fine, crisp, tender and juicy, quality very good. Oct. to Jan.

Yellow Bellflower. Adapted to the northern and middle states; highly esteemed for its excellent dessert qualities. Oct. to Feb.

Esopus Spitzenburg. Large, deep red with gray spots, and delicately coated with bloom; flesh yellow, crisp, rich and excellent. Nov. to Apr.

Jacob Sweet. A large, showy apple, green or yellowish, often with bright blush. One of the best sweet apples. Oct. to Apr.

Alexander. Of Russian origin. Large; deep red or crimson; flesh yellowish white, crisp, tender, with pleasant flavor. Tree very hardy. October.

Duchess of Oldenburg. A large, beautiful Russian apple; roundish; streaked red and yellow; tender, juicy, pleasant; a kitchen apple of best quality, and esteemed by many for dessert. Tree a vigorous, fine grower, and an abundant bearer.

Succeeds well in the Northwest, where most varieties fail. The hardiest valuable fall apple. We find Duchess the most valuable commercial variety, free from blight, a sure cropper, hardy as an oak, having survived in some instances when all others died (except Wealthy), and all in all a wonderful variety. Very hardy. Aug. and Sept.

Price for all varieties of Apple Trees on this page grown on the best imported French Apple stocks:
First class trees, 2 years, 5 to 6 feet high, 24 cents each, 10 for \$2.25, 100 for \$20.00.
Extra size trees, 2 years, 6 to 7 feet high, 29 cents each, 10 for \$2.75, 100 for \$25.00.

Duchess of Oldenburg

Pigeon, Mich., Apr. 7, 1911.

Maloney Bros. & Wells Co., Dansville, N. Y.

Summer Varieties of Apples

Yellow Transparent. Medium size, roundish, oblate, slightly conical; skin pale yellow when fully matured; flesh tender, juicy, sprightly sub-acid; good. August.

Hubbardston. (Hubbardston Nonsuch). Large; striped yellow and red; tender, juicy and fine; great bearer. One of the best. Nov. to May.

Walbridge. Medium size, oblate, regular; skin pale yellow shaded with red; flesh crisp. Hardy and productive; a late keeper. January to May.

By judicious selection of summer, autumn and winter apples, a constant succession can easily be obtained.

Tetofsky. Tree very hardy and productive, fruit striped and splashed with red, flesh white, firm, tender, juicy, quality fair to good. August to September.

Fanny. Large, deep rich crimson, tender, juicy, pleasant. Tree vigorous and very productive. Aug.

Carolina Red June. Small or medium, deep red, quality good. Tree hardy and a fine grower. Aug.

Williams Favorite. A bright red apple of mild, agreeable flavor. Aug. to Sept.

Golden Sweet. Large, pale yellow, tree a good grower and very productive. Aug. to Sept.

Early Harvest. Medium to large size; pale yellow; tender, with a mild fine flavor. Tree an erect grower and a good bearer; excellent for orchard and garden; one of the first to ripen. Middle to end of August.

There's Big Money in An Orchard of Apples

Ben Davis Apple is hardy and attractive, succeeds wherever apples are grown. There is no apple that has more favors on account of its hardiness, productiveness, beauty and endurance in shipping. It is excellent for cooking. There are better apples, but where Ben Davis succeeds one can always be sure of success, owing to its regular and heavy bearing qualities. The fruit is thick-skinned, does not show bruises easily, and presents a good appearance in the package after being handled and shipped in the ordinary way. November to April.

Wolf River. Fruit is very large, some specimens weighing 27 ounces; round, flattened, conical, highly colored. An excellent cooking apple. Sept. to Dec.

Seek No Further (Westfield). An old favorite dessert apple. Oct. to Feb.

Grimes' Golden. Medium to large size; skin golden yellow, sprinkled with gray dots; flesh crisp, tender, juicy, sprightly, very good to best. Grown in the South and Southwest. January to April.

Price for all varieties of Apple Trees on this page grown on the best Imported French Apple stocks:
First class trees, 2 years, 5 to 6 feet high, 24 cents each, 10 for \$2.25, 100 for \$20.00.
Extra size trees, 2 years, 6 to 7 feet high, 29 cents each, 10 for \$2.75, 100 for \$25.00.

McIntosh. The Famed Red Winter Dessert Apple

McIntosh Red Apple. An exceedingly valuable, hardy, attractive apple. A good annual bearer of fair, handsome fruit, being especially desirable for fancy trade. It comes into bearing young, yielding large crops of fine fruit almost annually. October to January.

American Blush one of the best Apples

American Blush. (High Quality Red Winter Apple. Here is an apple that is not surpassed the world over for large size, great beauty of color, or for excellent quality. It is an apple that should be growing in every garden and orchard. Fruit large, roundish; color bright red on yellow skin; flesh yellow, with a fine, rich, aromatic flavor, sub-acid. The tree is a vigorous grower, and is exceedingly productive, bearing an abundant crop of fruit every year. November to January.

Price for all varieties of Apple Trees on this page grown on the best imported French Apple stocks :

First class trees, 2 years, 5 to 6 feet high, 24 cents each, 10 for \$2.25, 100 for \$20.00.

Extra Size trees, 2 years, 6 to 7 feet high, 29 cents each, 10 for \$2.75, 100 for \$25.00.

WINTER BANANA APPLE
FINEST TABLE APPLE IN THE WORLD
BEARS FRUIT AT TWO YEARS OLD.

Winter Banana. Fruit large size, perfect in form; golden yellow, and beautifully shaded and marbled with bright crimson red; flesh lemon-yellow, fine grained, sub-acid, rich, aromatic flavor, and of the highest quality. A good keeper. Tree remarkably strong grower, and on account of its great hardiness, will thrive in any climate. Its early bearing is something simply wonderful, generally producing a fine crop the second year. A valuable market variety. November to January.

Maloney Bros. & Wells, Dansville, N. Y., Dear Sirs: I have one Banana Apple tree that I bought at one year old, planted 3 years, which had 13 apples on last year. Very truly yours, J. B. K., Rosevelt, O'La., Feb. 28, 1909.

Wealthy Apple, Hardy, Productive, Bright Red in Color, of Good Quality and Early Bearer

Wealthy Apple. A patron writes that from 450 Wealthy apple trees 5 years planted, he sold \$600.00 worth of fruit, some trees yielding a barrel of apples. From one tree 4 years old he picked 3 bushels of apples. Wealthy is one of the best red early winter apples. Owing to its early bearing qualities it is planted largely as a filler. Its extreme hardiness makes it a valuable variety for the Eastern States and is considered to be one of the best all around early winter apples to grow. Fruit large, roundish; skin smooth, oily, covered with a dark red. Flesh white, tender, juicy, vinous, sub-acid; quality very good. The variety is particularly valuable for cold climates because the tree is very hardy. Wealthy is being planted largely for commercial purposes as a filler in many sections of New York State. Oct. and Nov.

Rhode Island Greening. Known everywhere. This large and superior winter apple is famous over a large extent of country, and is more highly prized for cooking and eating than any other variety. It is a good keeper but will keep better if picked early. This Greening is a beautiful yellow color when ripe, and is a most abundant yielder. March to April.

Jonathan. A beautiful red apple, highly flavored and of excellent quality, being tender, juicy, spicy, and rich—a splendid family sort and highly profitable for market. Tree long-lived, productive, and an early bearer.

Bailey Sweet. A beautiful red apple of good quality. October to January.

Sutton Beauty Apple. A beautiful winter apple, a remarkably profitable variety of superior quality, and on account of its great beauty, productiveness and quality, should be found in every collection. Medium to large, roundish; waxen yellow, striped with deep carmine; flesh white, sub-acid; tender, juicy, good. A long keeper. Jan. to Feb.

Gravenstein. An attractive and excellent quality apple. For culinary purposes it is perhaps unexcelled by any variety of its season. Fruit large and uniform in size, skin thin, tender, greenish-yellow overlaid with dark red.

Stark. Large, striped, mild, sub-acid, good. Valuable as a keeper. January to May.

Price for all varieties of Apple Trees on this page grown on the best imported French Apple stocks:

First class trees, 2 years, 5 to 6 feet high, 24 cents each, 10 for \$2.25, 100 for \$20.00.

Extra size trees, 2 years, 6 to 7 feet high, 29 cents each, 10 for \$2.75, 100 for \$25.00.

Buy Direct of the Growers and Sellers of Fresh Dug, High Grade Fruit Trees, True to Name, and Save 50 Per Cent.

Baldwin, the Most Popular Apple

Wagener. (Red Winter Apple.) Wagener is one of the most beautiful winter apples ever grown. It is supposed to be a seedling of the Northern Spy. It is much brighter red than the Spy. It is of the highest quality, the flesh being crisp, tender and aromatic. We know of no apple possessing greater beauty or of finer quality than the Wagener, and yet it is little known. It succeeds well East and West. No orchardist's list of varieties can be complete without this beautiful and superior flavored apple. Of medium to large size; firm fleshed, sub-acid and fine quality. It is very desirable for culinary uses, but is especially esteemed for dessert. It comes into bearing at an early age and is a reliable cropper. Dec. to May.

100 Per Cent Saved

Columbus, Ind., Dec. 9, 1910.
Maloney Bros. & Wells Co., Dansville, N. Y.

Dear Sirs:—The trees received from you are far better than I expected, and in fact are the finest lot of trees all through that I ever saw. I didn't suppose that such roots could be grown on a tree. I will say that I saved 100 % from agents' prices, and my trees run better quality than any I have ever seen sold here.

Wishing you success which you are bound to have if all your stock is like you sent me, I am,

Yours respectfully,
R. C. Mallory.

Baldwin. A great market apple, very productive of fair handsome fruit. No variety yields larger crops or bears shipment better, or is more attractive in color, size and shape, than the Baldwin. It is esteemed as an eating apple, and for cooking. Thousands of barrels of this fruit are exported to England annually. For a commercial orchard it can be relied upon. Large, bright red, crisp, juicy and rich; tree vigorous, upright, and productive. In New England, New York, Ontario and Michigan, this is one of the most popular and profitable sorts for table or market. Dec. to Mar.

Fanny. (Late Summer Apple.) It is the handsomest fruit of the season, and there is no apple of its season that compares with it in fine quality. This apple is rare, being seldom found in any catalogue. We have taken great pains to have it true to name.

Rome Beauty. A large and handsome apple, almost entirely covered with bright red; of high quality. The flesh is tender, juicy and highly flavored. It is a popular apple over a wide

range of country, particularly in the West. Dec. to Mar.

Smokehouse. A very pleasant flavored dessert apple. Tree a vigorous grower, healthy, hardy and reliable cropper. Fruit of medium to large, uniform size and shape. Color yellow or greenish, mottled with rather dark red, sometimes deepening to a solid bright red. Oct. to Mar.

Baxter. A large red apple, decidedly attractive in appearance; vigorous and productive. Nov. to Jan.

Wagener, Beautiful Red Winter Apple

Price for all varieties of Apple trees on this page grown on the best French Imported Apple stocks:

Extra size-trees, 6 to 7 feet high, 29 cents each, 10 for \$2.75, 100 for \$25.00.

York Imperial Apples Sell Readily and at Fancy Prices on the English Market

York Imperial Apple. This is a fine, hardy, large, red winter apple. It succeeds over a wide range of country. It comes into bearing at four years from planting, bears regularly and heavily. The foliage and fruit are remarkably free from scab. The fruit is of medium size, skin yellow and almost wholly covered with two shades of red, the darker one disposed in distinct stripes. A good shipper, bringing highest prices. H. W. Anderson, Pa. writes that from a tree thirteen years old he picked seventeen bushels of No. 1 apples, and that another older tree of the same variety gave fifty-one bushels. The average price paid for the fruit is steadily on the increase, and the immense demand for home consumption, foreign shipping, canning and evaporating, assures us that it will continue to increase. We especially recommend everybody to plant a few trees of this valuable winter apple. November to February.

Northwestern Greening. A round, large, attractive, greenish yellow apple; flesh fine grained, juicy, firm, good quality; splendid keeper; ships well, hardier than R. I. Greening and on that account considered valuable for districts where the climate is too severe for the R. I. Greening, as it has stood the most trying tests and found equal to Wealthy in point of hardiness; especially good for planting in the Middle Atlantic and New England States. Oct. to Apr.

This past season Mr. Edwin C. Tyson, of Flora Dale, Pa., sold \$960.00 worth of apples from 54 trees that five years ago he started to pull out.

Black Gilliflower. A valuable dessert apple, distinct in color, form and flavor. Yellowish, almost completely covered with red, which in highly colored specimens becomes dull purplish and very dark. The flesh is whitish, firm, rather tender, mild, subacid, good for dessert and market. Jan. to Feb.

200 Pleasant St., Arlington, Mass., Nov. 5, 1910.
Messrs. Maloney Bros. & Wells, Dansville, N. Y.

Gentlemen:—The trees and grape vines reached me in good order. I have never before seen such splendid roots on any previous purchases from other nurseries, nor have I heretofore ever received such fine looking trees. Truly yours, E. R. Edgett.

Maiden's Blush. Large, flat; pale yellow with a red cheek; beautiful; tender and pleasant, but not high flavored. Tree an erect grower, and a good bearer. A valuable market apple, the fruit selling at three dollars per barrel. It is recognized as a standard market variety and usually sells above the average prices for varieties of its class. In many localities it has proved a very satisfactory variety, because the tree is a fine grower, hardy, long lived, comes into bearing rather young, and is a reliable cropper. Sept. and Oct.

Price for all varieties of Apple Trees on this page grown on the best Imported French Apple stocks:

First class trees, 5 to 6 feet high, 2 years, 24 cents each, 10 for \$2.25, 100 for \$20.00.

Extra size trees, 6 to 7 feet high, 2 years, 29 cents each, 10 for \$2.75, 100 for \$25.00.

It sometimes happens that we send two catalogues to one address. If you should receive more than one copy please hand the extra one to some friend who will be interested in it.

King, a Beautiful Red Apple of Excellent Quality

King. (King of Tompkins Co.) The fruit has a beautiful red color, with enough clearly contrasting yellow to make a very attractive appearance. It is well adapted for marketing in fancy packages. When you see in the market apples of extraordinary size, beautiful red in color, specimens that attract the attention of everybody who passes by, you may know that these are the King apple, an appropriate name since it is one of the largest size and possessed of the greatest beauty. The market is never fully supplied with this variety, since its size and beauty make it in great demand. Tree a vigorous grower, good bearer and hardy. Nov. to Jan.

Tolman Sweet. Medium size; color, light yellow; flesh white, firm, rich, and very sweet. Excellent for winter baking. This is the old favorite, highly prized for baking, etc. Productive, an early bearer, long keeper. Nov. to Apr.

Stayman's Winesap. Fruit medium, large; skin green and yellow, red-striped; flesh yellow, firm; quality excellent. A seedling of Winesap but larger, better and more productive. Dec. to Apr.

Fameuse. (Snow Apple). Hardy; medium size; deep crimson; flesh is snowy white, tender, melting and delicious. Tree vigorous with dark wood; one of the finest dessert fruits and valuable for market. November.

Roxbury Russet. Medium to large. Surface rough, greenish covered with russet. Tree free grower, spreading; a great bearer. Keeps until June. Its great popularity is its productiveness and long keeping.

Rome Beauty. A large and handsome apple, almost entirely covered with bright red; of high quality. The flesh is tender, juicy and highly flavored. It is a popular apple over a wide range of country particularly in the West. Dec. to March.

Bismarck Apple. An attractive apple in color and shape, the skin being a bright yellow, covered with bright carmine. The fruit is of large size, specimens having been grown weighing nearly two pounds each. The flesh is yellow, tender, juicy and of good quality. Nov. to Feb.

Ontario. Fruit large, uniform in size and shape; color, yellow splashed with carmine, highly colored, flesh tender, sub-acid. Nov. to Mar.

Gano. An improved Ben Davis, adding to the good qualities of that variety a much handsomer fruit of deep, dark red, that brings a ready sale in market. Dec. to Mar.

Red Astrachan

Astrachan Red. Large, roundish, nearly covered with deep crimson overspread with a thick bloom; juicy, rich, beautiful, good bearer. August.

Longfield. An early and abundant bearer; medium to large; yellow, with a blush on sunny side. Dec. to Mar.

Mann. Fruit medium to large; skin deep yellow, flesh yellowish, mild, pleasant, sub-acid. An early and annual bearer. Jan. to Apr.

Prices for all varieties of Apple trees on this page grown on the best French Imported Apple stocks:
First class trees, 2 year, 5 to 6 feet high, 24 cents each, 10 for \$2.25, 100 for \$20.00.
Extra size trees, 2 year, 6 to 7 feet high, 29 cents each, 10 for \$2.75, 100 for \$25.00.

Plate of Northern Spy Apples

Northern Spy. A hardy, red winter apple; a vigorous and healthy grower, forming an upright tree of large size quicker than most varieties. It has no superior for beauty and quality. When at its best it is of large size, and an abundant bearer. The fruit is held on a long, slender stem, which sways in the wind, therefore the Spy does not blow off from the tree. It is a good keeping apple. Dec. to Feb.

Transcendent Crab Apples

Best Hardy Crab Apples

Hyslop. Fruit large, deep crimson; produced in clusters; flesh yellow, sub-acid; good for cider and culinary purposes; popular on account of its large size, beauty and hardness.

General Grant. Large, round, yellow, covered with stripes of red, and when exposed to the sun, turning quite dark; flesh white, fine grained, a good grower, hardy and productive.

Transcendent Crab Apple. This is probably one of the best of all crab apples, is popular over the entire country. It is perfectly hardy everywhere and an immense bearer, yielding large crops every year. It is also a rapid grower and often bears fruit three years after planting. The color of this crab apple is as bright as the brightest red rose. The fruit of this crab is held in great esteem by housewives for making jelly, pickles and preserves. They can be dried, cooked, canned, or preserved with the skin on, saving a great amount of trouble. It is especially valuable for cider. The fruit is $1\frac{1}{4}$ to 2 inches in diameter, bright yellow, striped with red; excellent for culinary use. Immensely productive.

Price for all varieties of Apple trees on this page, grown on the best French Imported Apple stocks:
First class trees, 5 to 6 feet high, 2 years, 24 cents each, 10 for \$2.25, 100 for \$20.00.
Extra size trees, 6 to 7 feet high, 2 years, 29 cents each, 10 for \$2.75, 100 for \$25.00.

Maloney Bros. & Wells Co., Dansville, N. Y.

Gentlemen:—I write to let you know that I received my box of trees yesterday, opened up in the finest kind of condition. They are a fine lot of trees all through and I am perfectly satisfied.

Yours very truly, JOHN H. DEITRICH.

Hegins, Pa., Nov. 5, 1911.

Apple Trees One Year Old

Apple and pear trees in particular are undoubtedly the best trees for large plantings, the setback occasioned by transplanting is less, they live better, grow more rapidly, and are more easily planted, and the planter can shape them exactly to suit himself. We recommend the following list of varieties which we have in extra fine one year trees, four to six feet high.

Showing size, strong growth and superior roots of our one-year old Apple trees, four to six feet high.

Early Harvest. Pale yellow; tender, fine flavor. Tree a good grower and bearer. Aug.

Yellow Transparent. Pale yellow when fully matured, flesh tender, juicy, sub-acid. Aug.

Astrachan Red. Large, roundish, nearly covered with deep crimson, juicy, rich, beautiful, good bearer. Aug.

Duchess of Oldenburg. A large, beautiful apple; streaked with red and yellow, tender, juicy, a kitchen apple of best quality. Tree a vigorous grower, and an abundant bearer, very hardy. Aug. and Sept.

Maiden's Blush. Large, pale yellow with red cheek. A valuable market apple. Sept. and Oct.

Alexander. Large, deep red or crimson. Tree very hardy, October.

Wealthy. Very hardy. Fruit medium, roundish, skin covered with dark red. Flesh white, tender, quality very good. Oct. and Nov.

Gravenstein. Highly flavored, productive, handsome and excellent. Sept. to Nov.

Fameuse. Medium size, deep crimson. Flesh snowy white, tender and delicious. Nov. to Jan.

Rhode Island Greening. Known everywhere. A beautiful yellow color when ripe, and a most abundant yielder. Mar. to Apr.

Pewaukee. Esteemed especially for cold climates on account of its hardness. Fruit striped and splashed with dark red. Jan. to May.

Hubbardston. Large, striped yellow and red, tender, juicy and fine. Nov. to May.

Walbridge. Medium size, yellow, shaded with red. Hardy and productive, a late keeper. Jan. to May.

Jonathan. Fruit medium size; skin nearly covered with red; flesh white, juicy and tender, mild, sub-acid; quality good. Jan. to April.

Stayman's Winesap. A seedling of Winesap but larger, better, more productive. Dec. to April.

Tolman's Sweet. Flesh firm, rich and sweet, valuable cooking apple. Nov. to Apr.

Stark. Large, striped, mild, sub-acid, good. Valuable as a keeper.

York Imperial. A fine, hardy, large, red winter apple, bears young and regularly. A good shipper. Nov. to Feb.

Wolf River. Fruit is very large, highly colored. An excellent cooking apple. Sept. to Dec.

Rome Beauty. A large, handsome apple, covered with bright red, juicy and highly flavored. Dec. to March.

Northwestern Greening. Round, very large, greenish yellow, fine for eating, splendid keeper, ships well. Extremely hardy, vigorous, bears very young. Specially good for Middle Atlantic and New England States. Oct. to Jan.

Grime's Golden. Medium to large size; skin golden yellow, sprinkled with gray dots; flesh crisp, tender, juicy, sprightly, very good to best. Grown in the South and Southwest. Jan. to April.

McIntosh Red. An exceedingly valuable, hardy, attractive apple. A good annual bearer of fair, handsome fruit, being especially desirable for fancy trade. It comes into bearing young, yielding large crops of fine fruit almost annually. Oct. to Jan.

Roxbury Russet. Medium to large. Surface rough, greenish, covered with russet. Tree free grower, spreading; a great bearer. Keeps until June. Its great popularity is due to its productiveness and long keeping.

Additional Varieties, too well known to need description, **King, Northern Spy, Baldwin, Ben Davis, Winter Banana, Wagener, American Blush, Gano** and **Smokehouse.** Description of these to be found on other pages in this catalogue.

Price for all varieties of One Year Apple Trees, grown on the best French Imported Apple stocks: 4 to 6 feet high, 24 cents each, 10 for \$2.25, 100 for \$18.00.

The Advantages of Growing Dwarf Fruit Trees

Dwarf
Apple Trees
Can Be
Planted in a
Small Space

Often
Bear the
First Year
Planted

A Dwarf Apple Tree in Bloom Trained to a Trellis or Wire Fence

Dwarf fruit trees bear bigger, better fruit, bear several years earlier, and produce more returns for a given space than standard trees. This is all true, and there are even more important points. The low, broad heads are within reach, so that the apples can be easily picked. You can plant your garden full of dwarf trees and still grow strawberries and most vegetables. With dwarfs, some varieties will bear the first year, all will the second year, and bear a full crop the fourth year.

You can plant forty trees in a small space, save several years, get better fruit, and each tree should bear a bushel a year.

We offer the best trees, budded on Paradise or Doucin stocks. They will succeed in many places where standard trees fail. In a word, they are the kind of Dwarf trees that will put their strength into fruit instead of wood. To insure best selection of varieties, order at once since our supply is limited.

Kieffer Pear

usually, longlived and rarely blighted. A most valuable commercial sort that has been overlooked.

Flemish Beauty. This fine old Pear is still one of the hardest and most generally successful over a wide range of country, producing good crops annually of large, handsome fruit that is exceptionally good in quality. Considered one of the hardest and best for the northwest in which location it bears great crops of perfect fruit.

Wilder. A Pear of excellent quality. Handsome, melting, sweet, pleasant, with small core, fine grained, tender and juicy. Greenish yellow with brownish red cheeks. Tree a young bearer of heavy crops. Aug.

Kieffer. Large, rich golden yellow, sometimes tinted red on the sun-exposed side; fair quality, excellent for canning. It has become a profitable market variety on account of its good shipping and keeping qualities. To properly ripen should remain on the trees until leaves begin to fall, then gather carefully and allow to ripen in a cool dark cellar, or other place of even temperature. Tree a most vigorous grower, an early bearer, one of the most resistant to blight, very prolific, and widely planted throughout the country. The tree is so hardy and free from insect pests as to give it greater value than most other varieties. The fruit is of high color and great beauty and sells more readily than fruits of better quality. Oct. to Nov.

Louise Bonne de Jersey. Medium to large, pale green; very juicy and excellent flavor. Sept. to Oct.

Vermont Beauty. Medium; flesh melting, good quality; hardy and very productive. Oct. to Nov.

Koonce. Fruit large, tender and sweet, fine flavor. Free from blight; good grower and hardy. Aug.

Beurre Clairgeau. Large; light yellow, shaded with crimson and russet. Flesh yellowish, melting. Free, early, abundant bearer. Nov. to Jan.

Charlotte, N. Y., Oct. 6, 1911.

Maloney Bros. & Wells Co., Dansville, N. Y.

Gentlemen:—I wish to say that all trees and bushes bought of you have done exceptionally well and every one has proved true to name when fruiting. I am delighted with the trees and bushes you have sent me.

Very truly yours, A. E. STACE.

All agreements and acceptance of orders are made subject to the loss of stock by drought, fire, insects, or any other unavoidable causes.

Select Varieties of Standard Pear Trees

The cultivation of the Pear is very similar to that of the Apple. We can grow a barrel of Pears as cheap or cheaper than a barrel of Apples. Diseases that formerly affected the Pear have diminished. The soil for a pear orchard should be somewhat clayey in preference to sand. The value of a dozen or more pear trees about the home furnish a daily supply for the family and help to make the home attractive.

Anjou. This is one of the best known, most popular and profitable late pear. The tree is a vigorous grower, hardy and prolific. The pears are of large size, green in color, but often yellowing when thoroughly ripe. They are very juicy and luscious and of the best quality. For late fall and very early winter use, we have no better variety. Oct. to Jan.

Duchess D' Angoulene. A most dependable cropper, often fruiting the first season after planting. Fruit large, frequently weighing a pound. A dull greenish yellow, spotted russet, flesh white, rich and good quality. An all around profitable market pear. Oct. and Nov.

Sheldon. A large, round, russet and red pear of very fine quality, melting, rich and delicious. Tree vigorous, erect and handsome, bears well and should be more largely planted. October.

Lawrence. Medium to large, golden yellow, with melting, aromatic flesh. Unsurpassed as an early winter pear. The tree is hardy, healthy and productive, bearing large crops annually.

Wilder Early Pear

Price for all varieties of Standard Pears on this page grown on best imported Pear stocks:

First class trees, 2 years, 5 to 6 feet high, 20c each, 10 for \$1.90, 100 for \$15.00.

Extra size trees, 2 years, 6 to 7 feet high, 25c each, 10 for \$2.25, 100 for \$18.00.

A Bartlett Pear Orchard Properly Located and Intelligently Handled is the Best Investment That a Man Can Make

For years we have been growing pear trees and today have the best and largest stock of pear trees in the U. S. Every tree is well branched and abundantly rooted. The soil of our nurseries is particularly adapted to their culture. No better trees than ours, either Standard or Dwarf, can be sent out from any Nursery. Dansville trees are the very best obtainable. The Pear will grow on almost any soil, but thrives best in a rather heavy clay or loam.

A patron, H. D. B., Troy, N. Y., writes that he marketed 1000 barrels of pears, which were sold for \$3,250, and that the product of his 60 acre farm in 1903 was \$7,200, and in 1904, \$7,400.

Our patron, J. B. B., Boise, Idaho, writes that last year, from his 3 acre pear orchard, he picked 850 boxes, which sold in New York City for \$3,825.

Bartlett, the Most Productive and Profitable Pear

Bartlett. Large, coloring when fully ripe to waxen yellow with red blush; juicy, melting, highly flavored. The tree bears early and abundantly. May be grown either as dwarf or standard, but succeeds best as a standard. Aug. and Sept.

Clapp's Favorite. A superb, large, long, yellow Pear, richly flushed with russet-red next the sun; juicy and delightful; ripens before Bartlett. Pick the fruit of this variety at least ten days before it ripens on the tree. Aug.

Seckel. A beautiful and delicious little Pear that is the standard of excellence in its class. One of the richest and highest-flavored Pears known, always in demand for desserts and luncheons and better known than any Pear of its class. The tree makes a somewhat slow but stout and erect growth. Sept. and Oct.

Worden Seckel. A beautiful and delicious Pear, much larger than Seckel, equals it in flavor and quality, surpasses it in size, color and beauty.

Prices for all varieties of Standard Pear trees on this page grown on best French Imported Pear stock:

First class trees, 2 years, 5 to 6 feet high, 24 cents each, 10 for \$2.00, 100 for \$16.00.

Extra size trees, 2 years, 6 to 7 feet high, 29 cents each, 10 for \$2.50, 100 for \$20.00.

250,000 One Year Trees Growing in Our Nurseries

One Year Standard Pear Trees

Today we have one of the best blocks of one-year pear trees we have ever grown. Every tree is from four to six feet in height and branched, which we can supply in the following varieties :

Showing size, strong growth and superior roots of our one year Pear trees, 4 to 6 feet high.

Bartlett. Large, coloring when fully ripe to waxen yellow with red blush; juicy, melting, highly flavored. The tree bears early and abundantly. May be grown either as dwarf or standard, but succeeds best as a standard. Aug. and Sept.

Clapp's Favorite. A superb, large, long, yellow Pear, richly flushed with russet-red next the sun; juicy and delightful; ripens before Bartlett. Pick the fruit of this variety at least ten days before it ripens on the tree. Aug.

Seckle. A beautiful and delicious little Pear that is the standard of excellence in its class. One of the richest and highest flavored Pears known, always in demand for desserts and luncheons and better known than any Pear of its class. The tree makes a somewhat slow but stout and erect growth. Sept. and Oct.

Sheldon. A large, round russet-and-red Pear of the very first quality. Hardy, free growing. Oct.

Beurre D'Anjou. A large greenish Pear, shaded with russet-crimson; the flesh is high-flavored, rich and vinous; the tree is very productive, either as dwarf or standard. For late fall and very early winter use, we have no better variety. Oct. to Jan.

Lawrence. Medium to large, golden yellow, with melting, aromatic flesh. Unsurpassed as an early Winter Pear. The tree is hardy, healthy and productive, bearing large crops annually. Nov. and Dec.

Flemish Beauty. This fine old Pear is still one of the hardest and most generally successful over a wide range of country, producing good crops annually of large, handsome fruit that is exceptionally good in quality. Sept. and Oct.

Wilder. Handsome, melting, sweet, pleasant and of the best quality for an early Pear. Aug.

Duchesse d'Angouleme. Very large; greenish yellow, sometimes a little russeted. Makes a beautiful tree. Oct. and Nov.

Kieffer. This has become a profitable market variety on account of its good shipping and keeping qualities. While not of the best quality it is one of the favorite sorts for canning or preserving, and the early-bearing, heavy-cropping trees render it obtainable in quantity. Oct. and Nov.

Worden Seckle. A beautiful and delicious Pear, much larger than Seckle, equals it in flavor and quality, surpasses it in size, color and beauty.

Special price for all varieties of one-year Pear trees, grown on the best French Imported Pear stocks : 4 to 6 feet high, 20 cents each, 10 for \$1.80, 100 for \$17.00.

Maloney Bros. & Wells Co., Dansville, N. Y.

Gentlemen :—Our consignment of trees arrived today in good shape, as fine a lot of trees as I ever saw. They are well worth the money. We are more than satisfied.

Turtle Creek, Pa., Apr. 7, 1911.

Yours respectfully, JAS. H. WOODS.

Showing Productiveness of Montmorency Cherry

nurseries and offer this season as large and as fine a stock as

Wragg. Much like English Morello. More productive and excels in size, yield and quality. One of the hardiest cherries and has produced annual crops at the northernmost limit of cherry culture.

Ostheim. A hardy cherry from Russia. It has been tested in the severest winters of Minnesota and has been found perfectly hardy. Fruit large.

Dyehouse. A hardy and valuable cherry. The earliest cherry of fine quality. Often bears at two years old, and has the appearance of being covered with a purple cloth, such is the abundance of the fruit. Has the smallest pit of any cherry known. For tarts, pies, and especially for canning, it has no superiors among cherries.

we are offering
Cherry Trees
this Spring.

Montmorency Cherry Pays Big Profits

Montmorency Hardy Cherry. A beautiful, large, red cherry; much larger and firmer than Early Richmond, and fully 10 days later in ripening. Being extraordinarily prolific and very hardy, it can be recommended as a variety of great value. Valuable for canning and preserving. A patron writes that six years ago he planted 50 Montmorency cherry trees from which he has just harvested \$150 worth of fruit. One acre of Montmorency cherries, owned by a neighbor, has returned an average annuity of over \$600 for the last ten years.

Price for all varieties of Cherry trees on this page, grown on the best French Imported Cherry stock:
First class trees, 4½ to 5 feet high, 2 years, 18 cents each, 10 for \$1.50, 100 for \$11.00.
Extra size trees, 5 to 7 feet high, 2 years, 20 cents each, 10 for \$1.85, 100 for \$14.00.

Two of Our Extra Size Sour Cherry Trees. Note Superior Root System

Sour Varieties of Cherries

bring large profits to the grower, are even more profitable than apples, maturing their crop long before the season for marketing apples approaches. Montmorency cherries will hang on the tree for ten days after they are ready to pick.

A Good Cherry Crop

A letter from J. T. Bealby, Nelson, B. C., tells of a most remarkable yield of cherries in that favored section for growing this fruit. He says:

"Last year and this, twenty-nine cherry trees, ranging in age from ten to seventeen years, produced an average of two tons of fruit, which has sold for close upon \$600. One seventeen-year-old-tree last year produced fruit which sold for \$93, and the present year this same tree produced \$64 worth of fruit."

Olivet. A new Duke of French origin. Unlike most others of this class, it is said to be very early and to ripen over a long period. Fruit very large.

May Duke. Large, red; juicy and rich; an old, excellent variety; vigorous, productive. June 15.

Louis Phillippe. Large and beautiful fruit of blackish red; nesh tender, mildly acid, good to best. Mid-July.

Baldwin. Fruit very large, almost round, dark red, slightly sub-acid, the sweetest and richest of the Morello type. Remarkable for earliness, quality, vigor, hardiness and productiveness. June.

Vladimir. Hardy, strong grower, very productive, sub-acid, of excellent quality, juicy.

Reine Hortense. Large, bright red, vigorous, productive, delicious.

Large English Morello Cherries

Large English Morello Cherry. Without doubt one of the most valuable of this class. Easily grown, generally producing a heavy crop. Fruit dark red, quality good, with a rich, acid flavor; late. Tree very hardy, for extremely cold latitudes. August.

Maloney Bros. & Wells Co., Dansville, N. Y.

Gentlemen:—Trees came in perfect condition, and I am more than pleased with them. Can highly recommend you. Truly yours, R. B. VINTON.

East Orange, N. J., Apr. 6, 1911.

Maloney Bros. & Wells Co., Dansville, N. Y.

Gentlemen:—The order of trees has arrived and I am more than pleased, every tree seems to be perfect and very much larger than I expected.

Very truly yours, MRS. R. COYNE.

Price for all varieties of Cherry trees on this page, grown on the best French Imported Cherry stocks:

First class trees, 4½ to 5 feet high, 2 years, 18 cents each, 10 for \$1.50, 100 for \$11.00.

Extra size trees, 5 to 7 feet high, 2 years, 20 cents each, 10 for \$1.85, 100 for \$14.00.

PLANT A CHERRY ORCHARD THIS SPRING

We have the finest and largest stock of cherry we have ever produced—finer trees cannot be grown than we offer, at a much reduced price.

Early Richmond Cherries

Early Richmond. This is one of the most valuable and popular cherries and is unsurpassed for cooking purposes. This hardy cherry fruits on young trees soon after planting. It is the good old variety that yields such marvelous crops in the gardens. The most hardy of all varieties, uninjured by the coldest winters. Tree slender in growth, with a roundish spreading head exceedingly productive. Ripens through June.

Price of Early Richmond Cherry trees grown on the best French Imported Cherry stocks:
First class trees 4½ to 5 feet high, 2 years, 18 cents each, 10 for \$1.50, 100 for \$11.00.
Extra size trees, 5 to 7 feet high, 2 years, 22 cents each, 10 for \$1.85, 100 for \$14.00.

Select Varieties of Sweet Cherries

The sweet Cherries are especially desirable for the garden or lawn, on account of their foliage, attractive blossoms and fruit.

Lambert Cherry. A fine sweet variety originating in Oregon, and one of the largest of all Cherries, dark purple red, turning almost jet black when ripe. Fresh, firm, rich, juicy, tree rugged, a strong grower and an enormous bearer. The growing of the sweet Cherry is a great industry only fairly well begun. There is an enormous market for the fresh fruit and when canned or preserved the markets of the world are open to the producer.

Mr. Ellis Moore, Ft. Collins, Colo. writes one of our patrons about our responsibility and the reply to his letter follows:

Scranton, Pa., Jan. 29, 1910.

Dear Sir:—I beg to say that we have had considerable dealings with Maloney Bros. & Wells in the way of purchase of nursery stock and we have found them a first class concern in all respects. Their goods are high class and our experience with them enables us to say that they are entirely reliable and I am sure you will find them a satisfactory firm to do business with.

Yours truly,

Lambert Cherries

Westfield Fruit Farms Co., J. B. Keefe.

Price of Lambert Cherry trees, grown on the best French Imported Cherry stocks:
First class trees, 5 to 6 feet high, 2 years, 35 cents each, 10 for \$3.25, 100 for \$28.00.
Extra size trees, 6 to 7 feet high, 2 years, 45 cents each, 10 for \$4.00, 100 for \$35.00.

Select Varieties of Sweet Cherries

Bing Cherry, One of the Most Profitable Varieties

Bing Cherry. This valuable new black cherry succeeds everywhere. Tree very thrifty and upright grower, very hardy and productive, flesh very solid, flavor of the highest quality, a fine shipping and market variety. It is one of the most delicious sweet cherries. This valuable cherry should be followed by Lambert, which is later in ripening. Both are grand cherries.

Price of Bing Cherry trees, grown on the best French Imported Cherry stocks :

First class trees, 5 to 6 feet high, 2 years, 35 cents each, 10 for \$3.25, 100 for \$28.00.

Extra size trees, 6 to 7 feet high, 2 years, 45 cents each, 10 for \$4.00, 100 for \$35.00.

**Black Tartarian Cherry
(Reduced)**

Black Tartarian. This fine old variety produces immense crops of very large, purplish black fruits of mild, sweet, jelly-like consistency. The tree makes a beautiful, erect growth. Late June and early July.

Windsor. A splendid, large, liver-colored Cherry that hangs a long time and rots but little. The flesh is remarkably firm and good, the tree very hardy and fruitful. Exceedingly valuable for late market and home use. July.

Yellow Spanish. Large, pale yellow, with red cheeks; firm, juicy and excellent, one of the best light-colored Cherries; vigorous and productive. Last of June.

Governor Wood. One of the best Cherries; very large, light yellow, marbled with red; juicy, rich and delicious; tree healthy and a great bearer; hangs well on the tree; vigorous. Last of June.

Schmidt's Bigarreau. Very large, deep black, tender, juicy, fine flavor. July. Tree vigorous and productive.

Dikeman Cherry. Fruit large, black, firm, of excellent quality, fine keeper and shipper. Valuable for canning.

Napoleon Cherry. Tree medium size, erect with roundish head, fruit borne generally in twos; very large oblong cordate, light lemon yellow with red cheek in the sun. Flesh very hard, brittle, colorless, reddish at the stone. Good, excellent bearer. Ripe about June 20th.

Napoleon Cherry

Price of Sweet Cherry trees, (except Bing and Lambert), grown on the best French Imported Cherry stocks:

First class trees, 5 to 6 feet high, 2 years, 20 cents each, 10 for \$1.85, 100 for \$15.00.

CHERRY GROWING

has the additional advantage to the grower that the trees come into bearing soon after planting and net a profit of \$15.00 per tree.

York State Prune Tree in
Full Bearing

Select Varieties of Plums

The Plum has not been planted as extensively as it deserves, and the lack of planting has doubtless been partly due to difficulty in marketing; but with the demand for good fruit in our eastern markets almost unlimited, and the establishment of canneries in most important fruit sections, they are again being planted in large quantities, as it is known that a little care and attention at the proper time will insure a profitable crop.

Plums are hardy and grow vigorously in nearly all sections, succeeding on any soil that grows good corn or potatoes. Plum trees are planted about as far apart as peaches; that is, from 15 to 18 feet apart each way. Many growers prefer to plant them closer one way than the other, and eventually to stop cultivation in one direction. If this system is used they may be placed 18 or 20 feet apart one way, and from 10 to 12 feet the other way. The trees are pruned the same way that apple trees are, when planted.

Groaning Under the Weight. Portion of a Burbank Japan Plum Tree in Fruiting.

Burbank is one of the best of Japan Plums. Unsurpassed for beauty and productiveness, as well as great hardiness of tree, with a foliage so perfect as to contribute in an essential degree to its health. Fruit large, oval, often with a slight neck; skin reddish purple; flesh yellow, rather coarse, but juicy and good. Its beauty as a market variety is unsurpassed. Last of August.

Price for all varieties of Plum trees on this page, grown on the best French Imported Plum stocks:

First class trees, 5 to 6 feet high, 2 years, 20 cents each, 10 for \$1.50, 100 for \$12.50.

Extra size trees, 6 to 7 feet high, 2 years, 25 cents each, 10 for \$2.00, 100 for \$17.00.

Special Orchard Planting size, 4 to 5 feet high, 15 cents each, 10 for \$1.25, 100 for \$9.00.

Maloney Bros. & Wells Co., Dansville, N. Y.

Gentlemen:—The three hundred Cherry trees received in fine condition and they are the finest lot of trees I ever received. Your grading is perfect.

Hilton, N. Y., Nov. 7th, 1911

Very truly yours, H. E. TENNY.

Abundance—One of the best Japan Plums. The tree a rapid grower, healthy, comes into bearing remarkably young and yields abundantly. Fruit of medium size, large when thinned; amber, with markings of red; juicy, sweet, of good quality when well ripened. May be picked when it begins to color; will keep a long time, color well and be almost as rich and sweet as if ripened on the tree. August.

Satsuma (Blood). A delicious Plum for canning, already famous for that purpose, and a grand market sort; in season after the European Plums and the main crop of peaches are gone. Very large, nearly round, with deep red skin and flesh; firm of good flavor; will keep from one to three weeks after picking. Yields well.

Red June. The great early market Plum. Medium to large; deep vermilion-red, with beautiful bloom; very showy; flesh light lemon-yellow, firm, slightly subacid, delightful; half-cling, with small stone. "Reliability of tree, size and beauty

Note Special Low Prices on Carolina Poplar Trees

Shropshire Damson (Very Productive)

Shipper's Pride. Large, nearly round; dark purple; quite juicy, sweet; splendid shipper and marketer; moderate grower; productive. Originated in northwestern New York.

Niagara Plum. This plum has become exceedingly popular throughout Western New York, where it originated. It is a very early plum, and valuable for this reason. It is red, large size, making an attractive appearance in market, and possesses good shipping qualities. It bears enormous crops of fruit. Tree is an upright grower, vigorous and healthy. Middle of August.

Moore's Arctic. Valuable for its productiveness and extreme hardiness. Fruit grown in clusters. Color dark blue or nearly black when fully ripe. Dr. Hoskins says this is the hardiest plum he has tested.

Yellow Egg Plum

A very large and beautiful egg shape plum, excellent for cooking, a rapid grower and very productive. Last of August.

Bradshaw Plum

Bradshaw Plum. A very large and fine early plum, dark violet red, juicy and good. Trees erect and vigorous; very productive; valuable for market. The tree is very hardy and vigorous. As regards productiveness it is unequaled by any plum we have ever fruited. To produce the finest fruit, heavy thinning should be practiced. The quality is excellent, and is destined to become one of the most popular of all plums for canning, while its attractive color, good quality and shipping properties will cause it to be sought for as a market variety. Middle of August.

Grand Duke. One of the best late plums for market, as large as Bradshaw, of same color, entirely free from rot. Last of September.

General Hand. A very large plum; roundish; color, deep yellow; flesh juicy.

Price for all varieties of Plum trees on this page, grown on the best French Imported Plum stocks:
First class trees, 5 to 6 feet high, 2 year, 20 cents each, 10 for \$1.50, 100 for \$12.50.

Maloney Bros. & Wells Co., Dansville, N. Y.

Gentlemen:—I wish to thank you for the very excellent stock you have shipped me and for your courtesy and business-like manner.

Bellows Falls, Vt., May 29, 1911.

Sincerely yours, A. A. HALLADAY.

**Lombard,
Hardy
and
Most
Productive
of all
Plums**

Lombard, an Excellent Variety

Lombard Plum has always been a great favorite with plum growers. The tree adapts itself to all localities and it is very productive and extremely hardy. In our experience it outyields all other varieties, yet all varieties of plums are remarkably productive. The fruit usually hangs so thick that we are compelled to thin out one-half. The more you thin it, the larger, brighter and better the remaining fruit will be. It is a handsome reddish plum, the flesh yellow, juicy and pleasant. It is an excellent variety and should be planted in all gardens and orchards. It can be relied on for a crop when other varieties fail.

**York
State
Prunes**

York State Prune. One of the largest, best in quality, and most productive of all prunes, large size, color dark blue, covered with purple black, delicious, freestone, a vigorous grower and hardy; originated with us at Dansville, where it has been grown largely by the Germans, who are great fruit growers. It is a seedling of the German Prune and has been sold by these Germans for German Prune to Buffalo fruit buyers in large quantities at profitable prices. It resembles Fellemburg more than it does German Prune. York State Prune is a vigorous grower, and is healthy and hardy here.

Price for all varieties of Plum trees on this page, grown on the best French Imported Plum stocks:
First class trees, 5 to 6 feet high, 2 years, 20 cents each, 10 for \$1.50, 100 for \$12.50.
Extra size trees, 6 to 7 feet high, 2 years, 25 cents each, 10 for \$2.00, 100 for \$17.00.
Special Orchard Planting size, 4 to 5 feet high, 15 cents each, 10 for \$1.25, 100 for \$9.00.

MALONEY BROS. & WELLS, Dansville, N. Y.

Gentlemen:— The box of trees arrived on time. We are well pleased with them, they are as fine a lot of trees as ever came to this county, at just half the price that we have been paying through agents.

Very truly yours,

H. P. OTTO.

Osterburg, Pa., April 24, 1910.

FELLEMBERG (French or Italian Prunes)

Fellemburg Prunes. A fine prune, oval; purple; flesh juicy and delicious; parts from the stone; fine for drying; Tree very productive. September.

French Prune (see Fellemburg)

Italian Prune (see Fellemburg)

York State Prune one of the largest, best in quality and most productive of all prunes, large size, color dark blue, covered with purple black, delicious; freestone, last of August; originated at Dansville, N. Y., a vigorous grower and hardy.

German Prune—Medium; oval; purple or blue; juicy, rich, fine. Tree vigorous and very productive. One of the best. September. Sells for higher prices in market on account of high quality. A leading favorite. There is no easily grown fruit that gives greater or more certain profit than the German Prune.

The Thanksgiving Hardy Prune—Very productive, good quality and long keeper. It will keep for weeks and months after picking like an apple. Another year's experience leads us to think that we have not claimed enough for it. We did not know that it was a very hardy variety until the winter of 1904 established that fact. This winter was the most severe ever experienced, and in consequence nearly all plum trees growing in the nursery rows in this country were injured or destroyed.

Hungarian Prune. (Pond's Seedling) Very large, dark red, juicy and very sweet. Its large size, bright color, productiveness and shipping qualities render it a profitable variety for home or distant markets. September.

Tatge. Evidently a seedling of the Lombard. Is larger, more nearly round, darker color and finer quality than that well known and excellent variety. Claimed to be the hardiest, most productive and longest-lived plum known. "I had quite a crop of plums. From 150 trees, I shipped 3,992 eight pound baskets. 31,936 pounds of fruit. On the same ground, between the trees, I have 1,200 currant bushes, from which I picked 956 quarts of currants. The plums and currants netted me \$650—all from 1½ acres of ground. The plum trees have been set five years, and the currants four years."—*L. E. Delaware.*

Geuii—(Blue Magnum Bonum)—This is one of the newer varieties originating in New York state. Season of ripening rather late. The color is a dark purple. The flesh is firm, sub-acid and agreeable. Size large. It would be difficult to select a larger or more attractive plum for the garden or orchard than this.

When we plant a tree we are doing what we can to make our planet a more wholesome and happier dwelling place for those who come after us, if not for ourselves.

Olicer Wendell Holmes.

Price for all varieties of Plum trees on this page, grown on the best French Imported Plum stocks:

First class trees, 5 to 6 feet high, 2 year, 20 cents each, 10 for \$1.50, 100 for \$12.50.

Extra size trees, 6 to 7 feet high, 2 years, 25 cents each, 10 for \$2.00, 100 for \$17.00.

Special Orchard Planting size, 4 to 5 feet high, 15 cents each, 10 for \$1.25, 100 for \$9.00.

Every Garden Should Contain Six or More Plum Trees for Home Use

Plums are not difficult to cultivate, and they are among the hardiest of our orchard fruits. Taking all into consideration, the best soil for plums is a loose, deep, gravelly loam, with an open sub-soil, such as is suited for apples or potatoes, although almost any soil may be used provided it is well drained. The trees can be planted much closer together than apple or pear, and yet, in field cultivation it is not best to crowd any kind of fruit trees; but in gardens, plums will fruit well when planted ten or twelve feet apart.

Coe's Golden Drop. Very large, light yellow, often dotted with red in the sun; an excellent late sort.

Spaulding. Flesh pale yellow, very sweet.

Green Gage. Flesh pale green, melting, juicy, exceedingly sweet and rich, and unequaled in flavor.

Field. A large, handsome, dark blue plum, almost black, of good quality.

Diamond. A large magnificent plum, color a dark purple, with a beautiful bloom. Tree hardy and productive.

Monarch. Tree an abundant bearer. Fruit large, dark purplish blue with dense foliage.

Tennant Prune. Large, dark purple, with a blue bloom.

Botan. One of the oldest known Japan varieties, hard and productive, of good quality. August.

October Purple. One of the hardiest of the Japan plums. Productive, of good quality and especially recommended.

Sultan. Another of the Japan plums, very attractive, good keeper and shipper.

Chabot. Medium to large, cherry red, flesh yellow, sweet, very prolific. One of the best Japan plums.

Price for all varieties of Plums (except Roosevelt) grown on the best French Imported Plum stocks:

First class trees, 5 to 6 feet high, 2 years, 20 cents each, 10 for \$1.50, 100 for \$12.50.

Extra size trees, 6 to 7 feet high, 2 years, 25 cents each, 10 for \$2.00, 100 for \$17.00.

Special Orchard Planting size, 4 to 5 feet high, 15 cents each, 10 for \$1.25, 100 for \$9.00.

Roosevelt Plum. This variety was first offered under the above name as a premium by a publication at Rochester, N. Y., who claimed they had been watching this plum for the past few years and were surprised at the results obtained in that section. It takes years to produce a variety that is better than those now on the market, and if you are willing to share a small part of the expense incurred, we will share the rest, by offering trees of this variety at a live and let live price. Roosevelt Plum is very productive, fruit large, color purple, good quality, and unexcelled for eating and canning purposes. The tree is a hardy, vigorous, upright grower, and is one of the most remarkable plums yet introduced. It has been thoroughly tested by prominent orchardists.

Parksburg, W. Va., Apr. 24, 1911.

Maloney Bros. & Wells Co., Dansville, N. Y.

Gentlemen:—The trees you shipped us were of excellent quality. We are more than pleased with the stock. We have planted this year nine thousand trees in all, and your stock is the finest that we have received. Yours truly,

ROSEMAR ORCHARD CO.

F. P. Moats, Pres.

Lusette Creek, Pa., Apr. 7, 1911.

Maloney Bros. & Wells Co., Dansville, N. Y.

Dear Sirs:—The trees arrived today in good shape and as fine a lot of trees as I ever saw. We are all well satisfied with them.

Very truly yours, JAS. H. WOODS.

Roosevelt Plum from a Photograph

Price for the Roosevelt Plum Trees grown on the best French Imported Plum stocks:

First class trees, 5 to 6 feet high, 2 years, 30 cents each, 10 for \$2.50.

Extra size trees, 6 to 7 feet high, 2 years, 35 cents each, 10 for \$3.00.

Special Orchard Planting Trees, 4 to 5 feet high, 25 cents each, 10 for \$2.25.

PEACHES. There are Few Kinds of Fruits More Highly Prized and More Keenly Relished

The Peach requires a well-drained, moderately rich soil; sandy loam is probably the best. Keep it clean and mellow about the roots of the trees, which are benefited by an occasional dressing of wood-ashes or potash in some other form. In planting, always cut back the stems of young trees about one-third and cut side branches to a single bud. Yearly pruning is necessary in order to keep the heads low and well furnished with bearing wood, for the fruit is borne on wood of the previous season's growth. Fine orchards of bearing trees in different sections bear convincing evidence as to purity and superiority of the trees we ship.

There are few kinds of fruit that are more highly prized and more keenly relished than juicy, luscious peaches. To be able to go out to the trees from July to October and gather ripe peaches from the trees in their most perfect delicacy of tender, melting flesh, and exquisite coloring of red and yellow skin, is a luxury that many seek, but comparatively few obtain. Many a one with a small garden plot, or a limited amount of land in a city or suburban town, by planting a few trees can enjoy truly ripe peaches direct from the tree.

The Famous Elberta Peach, Hardy and Productive

Elberta Peach. Unsurpassed as a valuable, large, beautiful peach of good quality. The best orchard variety, and valuable also for planting in the garden. A friend near here has planted many acres entirely to Elberta. Elberta is harder in bud than many varieties, therefore a more uniform cropper. Elberta is large, yellow, with red cheek, juicy and high-flavored, flesh yellow; freestone. Season medium early, following quickly upon Early Crawford.

Price for all varieties of Peach trees on this page: First class, 4 to 5 feet, 15 cents each, 10 for \$1.25, 100 for \$10.00. Largest size, 5 to 6 feet, 17 cents each, 10 for \$1.50, 100 for \$14.00.

The Delicious and Popular Niagara Peach (reduced size)

Niagara Peach. One of the best peaches that has been introduced for many years past is the Niagara. It originated in Niagara county, New York, and has been grown there for about ten years past, but only in a small way, until very lately. There are some commercial orchards that now have bearing trees of it in large quantities, not only in New York, but in other States, and they are doing splendidly, not only is the peach a good fruit to eat but the trees are hardy and healthy in leaf and bud and bear abundantly.

The fruit of the Niagara peach is much like that of Early Crawford in appearance, being large, oval, yellow with brilliant red cheeks. The stone parts very freely from the flesh. The flavor is rich and piquant reminding one of the very best peaches he ever ate, and far ahead of Elberta in this respect. Indeed, it is a rival of that famous variety as a market peach with several points in its favor as to quality.

The season is medium early, coming in just before Elberta and overlapping it a week or more. Those who intend to plant peach trees will do well to set some of the Niagara.

Carman. Fruit large, color creamy white or pale yellow with deep blush; flesh tender, fine flavor and quite juicy; one of the hardiest. Ripens with Early Rivers.

Greensboro. A valuable variety; color greenish-white, shaded and splashed with dark red, very hardy and not so subject to rot as are most early varieties.

Mr. L. G. Youngs, No. East, Pa. The gross income from one and a quarter acres of plums was \$1,200; one and a quarter acres of currants \$590; one-fifth acres of gooseberries, \$190.

Mr. C. V. Allis, Medina, N. Y., has a sixteen-acre peach orchard seven years old, which in 1909, when the trees were six years old, gave him a net profit of \$5,335 on his crop.

Staunton, Va., Nov. 20th, 1911.
Maloney Bros. & Wells Co., Dansville, N. Y.

Dear Sirs:—When I opened up the trees, I must say that I was surprised at the size of them and the roots. They are as fine as any I ever set out and better than those I bought from other nurseries, paying 50 to 75 cents each for the same trees you sold me for 15 cents each. I shall be glad to recommend you to anyone and you can use my name at any time as a reference. Another thing—this is the first order I ever sent in for trees where they sent me exactly what was ordered.

Yours respectfully, C. D. GARWOOD.

Price for all varieties of Peach trees on this page: First class, 4 to 5 feet, 15 cents each, 10 for \$1.25, 100 for \$10.00. Largest size, 5 to 6 feet, 17 cents each, 10 for \$1.50, 100 for \$14.00.

A Thrifty Low-Headed Early Crawford Peach Tree Four Years Old

Crawford's Early. A magnificent, large, yellow Peach, of good quality. Tree vigorous and very productive. Its fine size, beauty and productiveness make it one of the most popular sorts; no other variety has been so extensively planted. This valuable Peach has long been a favorite. Most people, when buying Peaches, ask for Crawfords, knowing but little about other varieties.

Wager. Medium, yellow, good quality. Tree hardy and productive. A profitable late variety. Last Sept.

Hiley. A large, early, white Peach highly colored on sun-exposed side. A profitable commercial variety, very hardy in wood and bud.

Belle of Georgia. Greenish-white with blush on sunny side. Large and showy, good quality. Tree a vigorous grower, a good bearer and quite hardy.

Crawford's Late. Fruit of large size; skin yellow, or greenish yellow, with dull red cheek; flesh yellow; tree vigorous, moderately productive. One of the finest late sorts. A most popular variety, largely planted along Lake Ontario. A neighbor, from six 5 year old trees, picked seventy-five baskets, which he sold at one dollar per basket. Last of September.

Pittston, Pa., Apr. 22, 1911.

Maloney Bros. & Wells Co., Dansville, N. Y.

Dear Sirs:—The Peach trees reached me in good condition and they are certainly a fine lot. My neighbor was more than pleased with quality of his.

Very truly yours, F. J. SCOONOVER.

Late Crawford, One of the Finest Late Peaches

Price for all varieties of Peach trees on this page: First class, 4 to 5 feet, 15 cents each, 10 for \$1.25, 100 for \$10.00. Largest size, 5 to 6 feet, 17 cents each, 10 for \$1.50, 100 for \$14.00.

In Planting Peaches

It is of the highest importance to cut back the trees severely. The stem should be reduced about one-third and the side branches cut back to one bud. This lessens the demands upon the roots, and enables the remaining buds to push more vigorously. Most failures in newly planted orchards may be ascribed to a non-observance of these directions.

Champion, One of the Best White Freestone Peaches

Yellow St. John. One of the best of the early yellow varieties. Of medium size, orange yellow with a red blush on sunny side, flesh tender, juicy and quality very good. Popular in many sections. Aug. 15th.

Crosby. Medium size; bright orange yellow streaked with carmine. One of the best.

Engle's Mammoth. Large, round, suture slight; yellow with red cheek; flesh yellow, stone small, free; sweet, rich juicy.

Fitzgerald. It is one of the hardiest peaches, both in bloom and tree; very prolific, large size.

Foster. Large, deep orange red, becoming very dark red on the sunny side; flesh yellow, very rich and juicy, with sub-acid flavor.

Triumph. Earliest yellow-flesh peach, with good eating and shipping qualities, sure and abundant bearer; strong, vigorous grower.

Smock Free (Beers Smock.) Fruit large, oval; skin orange yellow, a good market sort.

Champion. Fruit large, beautiful in appearance; flavor delicious, skin creamy white, with red cheek; freestone. Trees hardy and prolific. One of the best varieties for home use.

Chair's Choice, a Valuable Late Peach

Chair's Choice. Has no superior in quality and flavor and for profit is without a rival; large, yellow, free, rich in color, flesh very firm, and ripens after Smock; great bearer.

Kalamazoo. Large, golden yellow, with crim-

son cheek; flesh thick yellow, superb quality, small pit. Strong grower, early bearer, hardy and productive.

Early Rivers. Large, light straw color, with delicate pink cheek; flesh juicy and melting.

Price for all varieties of Peach trees on this page: First class, 4 to 5 feet high, 15 cents each, 10 for \$1.25, 100 for \$10.00. Largest size, 5 to 6 feet high, 17 cents each, 10 for \$1.50, 100 for \$14.00.

Orange Quince

Orange. The best of the older varieties, still more extensively cultivated than any other. Every one is acquainted with the Orange quince, a good old variety that never disappoints the planter; good for home use and for market. Its large golden yellow fruit of fine quality is to be seen in more or less quantities in nearly every garden or orchard every season, as it rarely fails to produce a crop. Ripens in Oct.

Rea's Mammoth. This seedling of the Orange quince has all the good qualities of that variety; its fair, handsome fruit is fully a third larger.

Bourgeat. Fruits of the largest size, round, smooth, of bright golden color, with small core. The tree exceeds all others in fruitfulness and bears when three or four years old.

Champion. A large, late-ripening sort, that produces good and constant crops. One of the best for sections not subject to early frosts.

Angers. A productive old sort, with rather acid fruit.

Price of all varieties of Quince trees, 4 to 5 feet high, 25 cents each, 10 for \$1.75, 100 for \$15.00, 3 to 4 feet high, 15 cents each, 10 for \$1.45, 100 for \$12.00.

Select Varieties of Dwarf Pear

Dwarf Pear Trees should be planted so that the point where the bud is on the quince root be two inches below the surface of the ground. Dwarf pear trees bear at an early age, often bearing the second year after planting. They occupy but little room, and yield superior specimens of fruit and an abundance of it. Dwarf pear trees should be kept cultivated, and yet we have seen dwarf pear trees bearing abundantly in sod ground that had not been cultivated for many years. But where the ground is not intended to be cultivated, ordinarily the standard pear tree will do better than the dwarf tree.

Some buyers of trees have an idea that nothing but the largest size trees are fit to plant, that all other sizes are poor trees. This is a mistake, as some of the best orchards are grown from the smaller size trees. Our 4 to 5 foot trees are not third class, but first class of their size, and while we do not recommend the small planter, or one who plants but a few trees, to select these for his planting, we do recommend the medium and small trees to the orchardist.

Jonathan. Fruit medium size; skin nearly covered with red; flesh white, juicy and tender, mild, sub-acid; quality good.

King. Fruit large; skin yellow, striped with red; flesh yellow, crisp and juicy; sub-acid.

Yellow Transparent. Trees early and abundant bearers. Fruit of medium size; skin white at first, turning to pale yellow; flesh tender, juicy and sub-acid.

Red Astrachan. Fruit round, nearly covered with deep crimson; flesh white, juicy and of decided acid flavor.

Baldwin. Tree vigorous and productive. Fruit large, round; skin deep red; flesh white, sub-acid.

Ben Davis. Fruit round, medium to large; skin yellow, red-striped; flesh white, juicy, sub-acid.

Gravenstein. Very beautiful sort, yellow and red-striped, fruit of large size; highly flavored.

Early Harvest. Medium size; skin pale yellow; flesh white, tender, juicy and sub-acid. Very prolific.

Wealthy. Hardy and vigorous; fruit round, oblate, medium size; skin white, yellow and red striped with crimson; flesh white, stained, tender; good quality. Trees begin bearing when young.

Rhode Island Greening. This large and superior winter apple is famous over a large extent of country, and is more highly prized for cooking and eating than any other variety.

Gilliflower. Black. An old dessert apple; tree a good vigorous grower and a reliable cropper.

Stayman's Winesap. A seedling of Winesap but larger, better and more productive. Dec. to Apr.

Tolman's Sweet. Flesh firm, rich and sweet, valuable cooking apple. Nov. to Apr.

Winter Banana. Fruit large, golden yellow, shaded red; flesh firm, finely grained, rich and sub-acid.

York Imperial. Fruit medium, round; skin greenish yellow, striped bright red; flesh yellow, crisp, juicy.

Spitzenburg. (Esopus.) Unequalled for its high rich flavor; color deep red; flesh yellow, crisp, rich and excellent.

Wolf River. Fruit is very large, some specimens weighing 27 ounces; round, flattened, conical, highly colored. An excellent cooking apple. Sept. to Dec.

Hubbardston. (Hubbardston Nonesuch.) Large; striped yellow and red; tender, juicy and fine; strong, good bearer.

Bismarck. Fruit large, oblate; flesh white, crisp, mild, juicy.

Duchess. Medium size; flesh white, juicy, red-striped; flavor sprightly. Trees abundant bearers.

McIntosh Red. Fruit round, medium, skin white and yellow, nearly covered with dark red; flesh white, tender, juicy, sub-acid.

Grimes' Golden. Fruit round, medium size; flesh yellow, tender, rich, sub-acid; quality the best.

Maiden's Blush. Of medium size; skin pale yellow, with beautiful red cheek; flesh white, tender and of sprightly flavor.

Gano. Large, perfect shape; smooth, deep red skin; flesh pale yellow, fine grained, mild, sub-acid.

Northern Spy. A hardy, red winter apple, a vigorous and healthy grower, forming an upright tree of large size quicker than most varieties. It has no superior for beauty and quality.

Jacob's Sweet. Very large, showy apple, green or yellowish. One of the best sweet apples.

Roxbury Russet. Medium to large, greenish covered with russet. Tree free grower, great bearer.

Fameuse. (Snow Apple.) Hardy; medium size; deep crimson; flesh snowy white, tender, melting.

American Blush. (High Quality Red Winter Apple.) Fruit large, roundish; color bright red on yellow skin; flesh yellow, with a fine, rich, aromatic flavor, sub-acid. The tree is a vigorous grower, and is exceedingly productive, bearing an abundant crop of fruit every year. Nov. to Jan.

Stark. Large, striped, mild, sub-acid, good. Valuable as a keeper. January to May.

Sutton Beauty Apple. Medium to large, roundish; waxen yellow, striped with deep carmine; flesh white, sub-acid; tender, juicy, good. A long keeper. Jan. to Feb.

Yellow Bellflower. Adapted to the northern and middle states; highly esteemed for its excellent dessert qualities. Oct. to Feb.

Crab Apples. Hyslop, General Grant and Transcendent.

Price for all varieties of Apple trees on this page, grown from the best Imported French Apple stocks: Bargain size trees, 2 years, 4 to 5 feet high, 18 cents each, 10 for \$1.75, 100 for \$15.00.

Bargains in Standard Pear Trees
4 to 5 FEET HIGH

\$10.00
per 100

These trees are first class in every way, four to five feet high, two year, well rooted and branched, and without doubt will live better when transplanted and grow more rapidly than large size trees, cost less to buy and less for freight and are more easily planted. The list of varieties includes the very best for garden and orchard planting.

Bartlett. Large, buttery, juicy, highly flavored, great bearer, very popular. Aug. and Sept.

Clapp's Favorite. Very large, yellow and dull red, with russet specks, melting, rich. Aug.

Kieffer. Its large size, handsome appearance and remarkable keeping and shipping qualities, make it exceedingly profitable for market. Oct. and Nov.

Flemish Beauty. Large, juicy, rich; one of the hardiest and most popular Sept. and Oct.

Angouleme. (Duchess.) Very large, buttery, rich, juicy, excellent; popular market variety. Oct. and Nov.

Anjou. Large, buttery, melting, rich, vinous. The best late fall and early winter variety. Oct.

Seckel. Small, skin rich, yellowish brown when fully ripe, with deep brownish red cheeks; flesh very fine grained, sweet and exceedingly juicy.

Lawrence. Medium, yellow, with brown dots, melting, pleasant, aromatic. Nov. and Dec.

Price of all varieties of Standard Pear trees on this page, grown on the best French Imported Pear stocks: Bargain size Trees, 2 year, 4 to 5 feet high, 15 cents each, 10 for \$1.35, 100 for \$10.00.

Bargains in Peach Trees
3 TO 4 FEET HIGH

\$7.48
per 100

Our Peach trees are all budded on stocks secured from the pits of the natural trees growing in the mountains of North Carolina, where disease is unknown.

Early Crawford. Large; yellow and red; good quality. . An old standard. Reliable commercial sort.

Niagara. Large, yellow and red; fine quality; as good as Crawford but more dependable bearer; the principal commercial sort now grown in the famous Niagara County peach belt.

Crawford's Late. Very large, productive and good; yellow with dull red cheek. Flesh yellow. Last of September.

Elberta. Large, yellow and red, handsome, fair quality. Most popular market peach. Hardy and dependable.

Champion. Fruit large, beautiful in appearance; flavor delicious, skin creamy white, with red cheek; freestone. Trees hardy and prolific.

Fitzgerald. It is one of the hardiest peaches, both in bloom and tree; very prolific, large size.

Crosby. Medium size; bright orange yellow streaked with carmine. One of the best standard market sorts.

Chair's Choice. Has no superior in quality and flavor, and for profit is without a rival; large, yellow, free, rich in color, flesh very firm, and ripens after Smock; great bearer.

Foster. Large, deep orange red, becoming very dark red on the sunny side; flesh yellow, very rich and juicy, with sub-acid flavor; earlier than Early Crawford; very handsome.

Kalamazoo. Large, golden yellow, with crimson cheek; flesh thick yellow, superb quality, small pit. Strong grower, early bearer, hardy and productive.

Engle's Mammoth. Large, round, suture slight; yellow with red cheek; flesh yellow, stone small, free; sweet, rich, juicy.

HARDY VARIETIES OF CHERRY TREES

Dyehouse. Medium size, red, acid, productive. Ripens just before Early Richmond. One of the best. June.

May Duke. Large, dark red, juicy and rich. Tree vigorous and productive. June.

Montmorency Ordinaire. A beautiful, large, red, acid Cherry of fine quality. Hardy and very prolific. Valuable market variety. Late June.

Olivet. Large; skin dark red; tender, rich, vinous, with mild sub-acid flavor. Productive. June.

English Morello. Large, reddish black, tender, juicy, acid, rich. Very reliable bearer and a money maker. July.

Early Richmond. Medium size, red, acid. Tree hardy, healthy and very productive. Most valuable and popular as a commercial sort. June.

Late Duke. Large, deep red, heart shaped, sub-acid, fine flavor. July.

Ostheme. Medium, dark red, sub-acid. Hardy and recommended for cold climates. July.

Wragg. Large, liver color, juicy and rich. Hardy and immense bearer. July.

Baldwin. Fruit very large, almost round, dark red, slightly sub-acid, the sweetest and richest of the Morello type. Remarkable for earliness, quality, vigor, hardiness and productiveness. June.

Louis Philippe. Large and beautiful fruits of blackish red; flesh tender, mildly acid, good to best. Mid-July.

Varieties of Sweet Cherries

4 to 5 Feet High

\$10.00

PER 100

Black Tartarian. This fine old variety produces immense crops of very large, purplish black fruits of mild, sweet, jelly-like consistency. The tree makes a beautiful, erect growth. Late June and early July.

Windsor. A splendid, large, liver-colored Cherry that hangs a long time and rots but little. The flesh is remarkably firm and good, the tree very hardy and fruitful. Exceedingly valuable for late market and home use. July.

Yellow Spanish. Large, pale yellow, with red cheeks; firm, juicy and excellent, one of the best light-colored Cherries; vigorous and productive. Last of June.

Governor Wood. One of the best cherries; very large, light yellow, marbled with red; juicy, rich and delicious; tree healthy and a great bearer; hangs well on the tree; vigorous. Last of June.

Napoleon Cherry. Tree medium size, erect with roundish head, fruit borne generally in twos; very large oblong cordate, light lemon yellow with red cheek in the sun. Flesh very hard, brittle, colorless, reddish at the stone. Good, excellent bearer. Ripe about June 20th.

Price for all varieties of Sweet Cherry Trees on this page, grown on the best French Imported stocks:
Bargain size trees, 2 year, 4 to 5 feet high, 12 cents each, 10 for \$1.00, 100 for \$10.00.

Bargains in Plum and Prune Trees

4 to 5 FEET HIGH

**\$9.00
per 100**

Lombard Plum, Hardy and Productive

The Lombard is a great favorite for the following reasons: The tree seems to adapt itself to any locality; it is extremely hardy, producing good crops where many varieties will not grow; it is a strong growing tree. The fruit usually hangs so thick on the limbs that we are compelled to thin out one half. The more you thin it, the larger, brighter and better the remaining fruit will be. It is a handsome reddish plum, the flesh yellow, juicy and pleasant. August.

Bradshaw. A very large and fine early plum, dark violet red, juicy and good. Trees erect and vigorous; very productive; valuable for market. The tree is very hardy and vigorous. The quality is excellent, and it is destined to become one of the most popular of all plums for canning, while its attractive color, good quality and shipping properties will cause it to be sought for as a market variety.

York State Prune. Large; blue; rich, juicy, fine. Excellent for garden or market, best

originated with us at Dansville. Tree a vigorous grower and hardy.

Geuii. Very large; deep bluish purple; flesh yellowish green, sweet and pleasant. September.

Fellemburg Prune. Medium size; purple; flesh juicy and delicious. Very fine and an excellent commercial sort. September.

Tatge. An Iowa Plum, much like Lombard in color, quality and season, and will succeed in the far North where other varieties fail.

Pond's Seedling. Very large and showy; light red; flesh rather coarse. September.

Imperial Gage. Medium to large; golden green; flesh juicy, rich, delicious. Middle of August.

Shropshire Damson. One of the favorite Damsons. Fruit oval; tree a good grower and enormously productive; fruit of medium size, produced in thick clusters, dark purple color. October.

Shipper's Pride. Large, nearly round; dark purple; quite juicy, sweet; splendid shipper and marketer; moderate grower; productive.

General Hand. Very large, skin deep golden yellow. Mid-season.

Yellow Egg. A large and beautiful egg shape plum, excellent for cooking; productive. August.

Reine Claude. (Bavay's Green Gage.) Fruit of fine quality, greenish, marked with red in the sun. Tree a good grower and productive. Sept.

Grand Duke. One of the best late plums for market; purple and free from rot. September.

Niagara. A very early purple plum; bears enormous crops of fruit. Middle of August.

Thanksgiving. Very productive, good quality and long keeper; tree very productive.

Abundance. Tree a rapid grower, healthy, bears remarkably young and yields abundantly. August.

Wickson. The largest of the Japan plums; color bright cherry red, tree very productive. Sept.

Red June. The great early market plum and best in quality of the Japan plums. August.

Burbank. Unsurpassed for beauty and productiveness. Aug.

AMERICAN NUTS AND NUT CULTURE

The constant and growing demand for nuts, and the immense quantities of them yearly imported to meet it, have given a great impetus to the planting of nut-bearing trees. So palatable and wholesome are the nut-kernels that they should become a staple article of food here, as in Europe. The returns from established nut-bearing orchards, as well as numerous experiments, show plainly how successful nut culture may be made in America. Most

farms contain land that would pay better planted in nut-bearing trees than in anything else; the nuts, in many cases, paying better than farm crops or fruits, while the trees are growing into valuable timber

The American Sweet Chestnut is adapted to a great portion of this country. It is valuable as a nut producing tree, timber and ornamental purposes. As high as \$14.00 per bushel has been paid for American Sweet Chestnuts when first brought into New York market. \$6.00 to \$10.00 per bushel is the common price. A well grown American Chestnut that has passed the quarter-century mark is a gracious delight to the eye of the lover of trees, and there is a peaceful, dignified impressiveness about a grove of old chestnut trees that is good to experience. The American Chestnut does not come into profitable bearing before ten years. It bears freely but not regularly. The tree is too large for orchard growth. The nut is a little too small and has too much white fuzz on it to be handsome in appearance, but its flavor is incomparable.

Price of American Sweet Chestnut trees, 4 to 5 feet, 65 cents each, 10 for \$5.00, 3 to 4 feet, 50 cents each, 10 for \$4.50.

English Walnut. A fine, lofty-growing tree, with handsome, spreading head; produces large crops of thin-shelled, delicious nuts which are always in demand at good prices. They are fairly hardy and are fruiting here in the Genesee Valley.

Price of English Walnut trees, 3 to 4 feet, 75 cents each, 10 for \$6.50.

Butternut. A fine native tree producing a large longish nut, which is prized for its sweet, oily, nutritious kernel.

Price of Butternut trees, 4 to 5 feet, 35 cents each, 10 for \$3.00.

Black Walnut. The common well-known Black Walnut, the wood of which is most beautiful and valuable. It is very productive in nuts, which are much liked by many.

Price of Black Walnut trees, 4 to 5 feet, 50 cents each, 10 for \$4.50, 3 to 4 feet, 35 cents each, 10 for \$3.00.

Chestnut, Spanish. A handsome round headed tree, producing abundantly, very large nuts that find a ready market at good prices.

Price of Spanish Chestnut trees, 4 to 5 feet, 50 cts. each.

SELECT VARIETIES OF APRICOTS

Apricot growing as an industry is rapidly spreading to many sections of the country. Up to the present time nurserymen generally have paid little or no attention to growing apricots in any large way, but we are growing them to meet the increasing demand, and offer the following reliable and hardy varieties. Every garden should have one or more trees.

Alexis. Large, yellow, red blush, sub-acid, rich and good quality.

Gibb. Medium, roundish, very light yellow, sub-acid.

Monpark. Large size, surface orange-red with a deep orange-red cheek with a rich, high flavor.

Budd. Yellow with fine red cheek, sweet juicy.

Harris. Medium, hardy, productive, bright yellow with red cheek, juicy and good.

Montgamet. Deep yellow, one of the best for preserving.

Price for all varieties of Apricot Trees on this page, 4 to 5 feet high, 25 cents each, 10 for \$2.25, 100 for \$20.00.

Maloney Bros. & Wells Co., Dansville, N. Y.

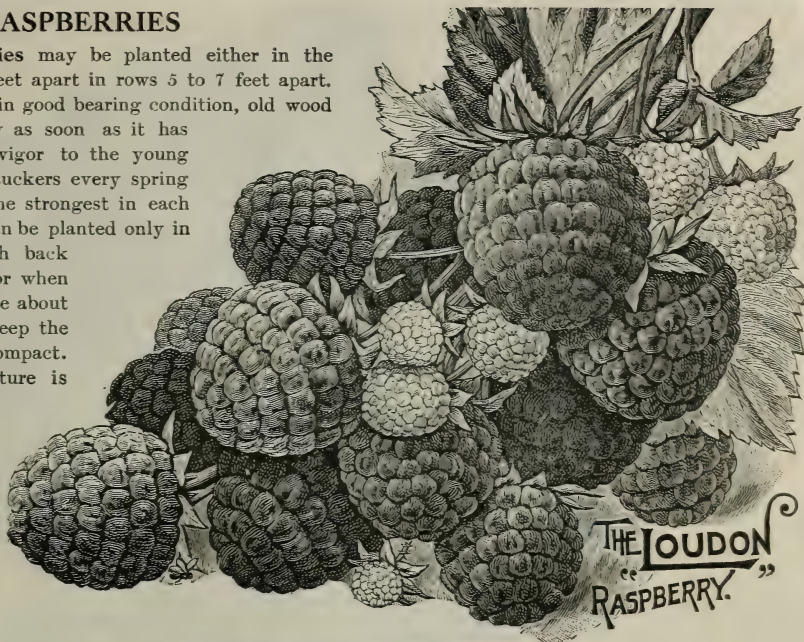

Gentlemen:—The trees I ordered of you came in good order and certainly are first class stock in every particular. I seldom feel duty bound to acknowledge getting more than my money's worth when I make a purchase, but in this case I wish to express my appreciation of the quality of the trees you sent me. The promptness with which you filled my order was indeed gratifying. I shall take pleasure in recommending your trees to my friends.

Yours respectfully,
GEO. TAYLOR.

Edinboro, Pa., Mar. 1, 1911.

RASPBERRIES

Red Raspberries may be planted either in the spring or fall, 3 feet apart in rows 5 to 7 feet apart. To keep the rows in good bearing condition, old wood must be cut away as soon as it has fruited, to give vigor to the young canes. Thin the suckers every spring to five or six of the strongest in each hill. Blackcaps can be planted only in the spring. Pinch back blackcaps early, or when the young canes are about 2 feet high, to keep the bushes snug and compact. Clean mellow culture is beneficial to both varieties of Raspberries, and mulching, both in summer and winter, is of decided benefit to them.

Loudon Hardy Red Raspberry

Loudon Raspberry, the hardiest of all, yields 200 bushels per acre, bears best on strong clayey loam, but succeeds well on sand. Prof. VanDeman has pronounced Loudon the best of all red raspberries. Considering its hardiness, productiveness, large size, quality and bright color. It will be difficult to secure a better raspberry than Loudon.

Price of Loudon Raspberry Plants, extra strong: 10 for 50c 100 for \$1.95, 1000 for \$18.00.

Cuthbert Red Raspberry, Large, Productive, Attractive

This is a valuable variety well tested throughout the country. It has given good results both for home use and market. Cuthbert is a good vigorous grower and possesses vitality necessary for a popular variety. It yields bountifully of large and beautiful bright red berries, which are easily picked and always command good prices. No fruit grower can afford to omit planting Cuthbert, and surely no person who has a garden should attempt to get along without red raspberries.

Price of Cuthbert Raspberry, extra strong plants: 10 for 35c, 100 for \$1.00, 1000 for \$9.50.

✓ Kansas the King of Black Raspberries

Kansas Black Raspberry is a strong, vigorous grower, standing extremes of drought and cold, and bearing immense crops. Early, ripening just after Palmer. Berries size of Gregg, of better color; jet black and almost free from bloom; firm, of best quality, presents a handsome appearance, and brings highest price in market. The average yield of an acre of Kansas in dried raspberries is 500 pounds. The average price, year by year, is twenty cents per pound. This year many fields are producing 700 pounds per acre and the price is twenty-five cents per pound. Mrs. J. Dewick of Italy, N. Y., shows a check for \$889.75, the proceeds of five acres, half of it the first picking. It is estimated that this vicinity will market from 125 to 150 tons, bringing a revenue of from \$60,000 to \$75,000. This variety is perhaps more generally known and planted than any other. It requires good, strong soil to produce best results, and responds liberally to generous treatment. Not the least of its many merits is its value for evaporating, as it gives more pounds of dried fruit to the bushel than any other variety.

Diamond Black Raspberry

Nemaha. The best late variety. The Nemaha is an excellent, large, black, good quality, late variety. The very fact that it is considered to be **better than the Gregg** is enough to cause it to be planted by every grower of black raspberries desiring a late variety.

Diamond Black Raspberry. (New) A valuable variety, hardy, productive, firm, of fine quality jet black, and one of the best market sorts. Before this variety was known, Gregg was the only extra large leading black cap. Diamond excels it in hardiness of bush and in quality of fruit. We have no hesitancy in pronouncing Diamond to be the best large black raspberry. The bushes are remarkably strong growing and healthy.

Douglas, Ariz., Dec. 8, 1910.

Maloney Bros. & Wells, Dansville, N. Y.

Gentlemen:—The trees reached me in fine shape, they were well packed and I am very much pleased with them.

Very truly yours, P. A. Lagerfeldt.

Price for all varieties of Black and Purple Raspberry named above, strong, well rooted plants 10 for 35c., 100 for \$1.75, 1000 for \$15.00.

An Ideal
Plantation
of Conrath
Raspberries
Growing and
Fruiting on
Our Large
Fruit Farm

Conrath, Early Black Raspberry. In Conrath we have united vigor, hardiness, large size and productiveness; qualities that will give it a foremost rank. It resembles Gregg in many ways, being probably a seedling of that variety, and the fruit retains its large size to the last picking. The canes are of iron-clad hardiness, very prolific, and make a good healthy growth. It is one of the best of the very early black-caps.

Gregg Black Raspberry. Of good size; fine quality; very productive and hardy. It takes the same position among blackcaps as Cuthbert among the red sorts. No one can afford to be without it. The standard blackcap by which others are judged.

Shaffer's Colossal Purple. An immense raspberry, both in cane and fruit. Canes are of wonderful vigor and size, hardy and enormously productive; berries are very large and of a purplish color.

Cumberland New Black Raspberry. This new berry is a very valuable acquisition. With its greatly superior size it combines the equally valuable characteristics of great firmness, splendid quality and wonderful productiveness. The plants are entirely hardy, very vigorous and healthy, throwing up stout, stocky, well branched canes that produce immense crops of magnificent berries. Fruit very large, firm, quality about same as Gregg, keeps and ships as well as any of the blacks. The most profitable market variety. Mid-season.

Profits in Black Raspberries

Any one who has room for one hundred plants can supply his table at very small cost of time and money. On one-fourth acre of land we picked the first year after setting, over three hundred quarts; the second year over 1,500 quarts. Gross receipts first year, \$50; second year, \$220. This is the way it was done: The ground was in excellent condition, sloped to the northwest; soil was sandy loam. Rows six feet apart, plants four feet apart in rows, crown set three inches below surface; soil packed firmly around roots.

Price for all varieties of Black and Purple Raspberries named above, strong, well rooted plants, 10 for 35 cents, 100 for \$1.75, 1000 for \$15.00.

Columbian Purple Raspberry is a new variety, much resembling Shaffer in growth of bush and fruit. A strong grower, unexcelled for productiveness and desirable for canning. Nine rows, 150 feet long, yielded 66 bushels. Color of the berry purple, like the Shaffer. Fruit very large, purplish color, rather soft; rich, sprightly flavor, unrivalled for canning, making jam, jelly, etc. Bush wonderful for vigor of growth and productiveness, attaining a very large size and producing immense crops.

President Wilder

The Best and Most Productive Red Currant

Wilder. (President Wilder.) Bush upright, vigorous; clusters above medium length; berries large to very large, averaging large; bright red; excellent, with a mild sub-acid flavor. Ripens early and remains bright and firm until very late. Because of its exceedingly vigorous growth, great productiveness, high quality and remaining good so long after ripening, we recommend this as one of the best red currants, both for table and market. One of the strongest growers and most productive. Bunch and berries very large, bright, attractive red color, even when dead ripe; hangs on bushes in fine condition for handling as late as any known variety. Kept well cultivated and fertilized they will regularly produce heavy crops of extra size fruit of the very best quality.

Price for all varieties of Currants: strong 2 year old bushes, 10 cents each, 10 for 75 cents, 100 for \$5.00, 1000 for \$45.00.
Strong 1 year old bushes, 7 cents each, 10 for 50 cents, 100 for \$4.00, 1000 for \$35.00.

Select Varieties of Currants

Plant in rows 6 feet apart and 4 feet apart in the rows, or, if to be cultivated both ways, 5 feet apart each way. Before planting, the roots should be shortened to 10 or 12 inches and, in planting, care should be taken to firm the earth about the roots. After planting, cut back the tops about one-half the previous year's growth. No plant will better repay generous treatment and high cultivation than the currant. Two or three forkfuls of good stable manure around each bush every fall is desirable.

Cherry. Bush vigorous, stocky and compact; cluster rather short, with short stems; fruit averages large; color fine, bright red; berry thin-skinned, juicy and fine-flavored. One of the most productive red varieties. Currants are not only healthful and refreshing in midsummer, but are always a profitable crop if properly cared for. There is money in this crop if it can be disposed of at six cents per quart, and the price is rarely less than ten cents.

La Versailles. Large, red, closely resembles Cherry, but slightly less acid; deep red, bunches long but regularly filled, bush rank grower, productive, valuable, one of the best market varieties.

Prince Albert. One of the best red currants. Bush a vigorous, upright grower. Very productive, berries medium to large, ripens quite late. Popular for canning.

Black Champion. Bush vigorous and productive; fruit averages above medium, pulp nearly sweet, mild-flavored. A desirable variety for general culture.

White Grape. The largest and best white. Garden not complete without it. Bush moderately vigorous, slender, branches somewhat spreading, productive, bunches three to four inches long. Berries quite uniformly large but vary from medium to very large. Translucent whitish, attractive in color, mild flavored, good quality.

Diploma. New red; very large, good quality, a strong grower and valuable for both home and market. Was awarded a gold medal at the World's Columbian Exposition as the largest currant, and considering its size, productiveness and quality, it must become a valuable variety.

White Grape Currants

CAROLINA POPLAR

We offer 75,000 extra fine Carolina Poplar Trees, 8 to 10 feet, at 15 cents each, 10 for \$1.35, 100 for \$9.00.

AT A BARGAIN PRICE

Select Varieties of Currants

Fay. (Fay's Prolific.) Bush vigorous but not quite so strong a grower as Cherry; cluster medium to long, with rather long stems; color darker; and berry averages large; juicy and less acid than Cherry. The high prices prevailing this year teach that the proper thing to do is to go right along growing fruit whether the price is high or low. It certainly does not pay to stop growing simply because prices for a year or two are low.

Red Cross. A strong growing variety. Cluster long; berry medium to large, bright red; quality good to best. It is exceedingly productive, and the currants are of large size. Further than this, the fruit is far sweeter than ordinary currants. From a patch of Red Cross of 14 rows, 480 feet in length, were picked 5,500 quarts, these selling for \$500.90. Not having time to peddle, these were sold mainly through a reliable commission house and netted over and above all commission, expressage, picking, etc., \$316.75.

Red Dutch. An old, well-known sort, good quality berry, medium, long bunch. Very productive.

Victoria. Bright red, bunches extremely long; berries medium size, of excellent quality. Good erect grower, very productive. Ripens late, making it one of the most valuable sorts.

Pomona. Medium size, clear, bright red, excellent quality, hangs long time after ripe; holds up well on market; is one of the best for shipping; easily and cheaply picked. Holds an unparalleled record for actual acreage yield in ordinary field culture.

Fay's Currant (reduced)

Home Garden Collection of Currants

12 Bushes, 2 year old for 75 cents

3 Red Cross
3 President Wilder
3 White Grape
3 Black Champion

12 Strong 2 year Currant Bushes

Special Bargain Price 75 Cents

Price for all varieties of Currants, strong 2 year old bushes, 10 cents each, 10 for 75 cents, 100 for \$5.00, 1000 for \$45.00.

Strong 1 year old bushes, 7 cents each, 10 for 50 cents, 100 for \$4.00, 1000 for \$35.00.

Garden Roots—Asparagus and Rhubarb

Conover's Colossal Asparagus. A standard variety of large size, tender and excellent quality. This variety is known everywhere. You will get more satisfaction out of a bed of asparagus than any other vegetable.

Price for strong 2 year roots of Conover's Asparagus, 50 for 60c, 100 for \$1.00, 1000 for \$6.00.

Palmetto Asparagus. A very early variety; even, regular size, of excellent quality. No home garden

can be complete without it. This is a large growing variety, particularly delicious in quality. Plant in rows 3½ feet apart, and one foot apart in the row. Let the lower ends of the roots extend down as far as they can but do not cover the crowns deep when planting.

Price for strong 2 year roots of Palmetto Asparagus 50 for 65c., 100 for \$1.00, 1000 for \$6.00.

Linnaeus Rhubarb. Large, early, tender and fine. The very best of all, which is a good paying, all season crop. There is a constant demand for it.

Price of Rhubarb, strong 2 year roots, 15c. each, 10 for \$1.00.

Vineyard Haven, Mass., Apr. 18, 1911.

Maloney Bros. & Wells Co., Dansville, N. Y.

Gentlemen:—The three cases of trees came in remarkable good order and on time. I have never seen any better two year old stock than these. I can conscientiously recommend your firm for first-class stock, good root system, great care in packing and promptness. Sincerely yours,

LOUIS H. BUCKSHORN.

Pittsburgh, Pa., Apr. 25, 1911.

Maloney Bros. & Wells Co., Dansville, N. Y.

Dear Sirs:—Am pleased to say that the trees you shipped me came to hand promptly, and I found them very satisfactory, in fact a fine lot of trees at a much lower price than I expected.

Very truly yours, JOHN M. PHILLIPS.

GRAPES

Campbell's Early Black. Strong grower, with large, healthy foliage, productive; its keeping and shipping qualities are equalled by no other early grape. Ripens with Moore's Early. Bunch and berry, large glossy black with blue bloom, sweet and juicy, seeds few and small, part readily from the pulp. Stands at the head of early black grapes for quality.

Concord. Black. Early. Decidedly the most popular Grape in America, and deservedly so. Bunch large, shouldered, compact; berries large, covered with a rich bloom; skin tender, but sufficiently firm to carry well to distant markets, flesh juicy, sweet, pulpy, tender; vine a strong grower, very hardy, healthy and productive. For general cultivation the most reliable and profitable variety.

Delaware. Red. Bunches small, compact, shouldered; berries rather small, round; skin thin, light red; flesh very juicy, sweet, spicy and delicious.

Brighton. Red. Bunch large, well formed; berries above medium to large, round; excellent flavor and quality; one of the earliest in ripening.

Catawba. Dark red when fully ripe. Bunch large, berries medium to large, skin thick, tough; flesh somewhat pulpy, with rich vinous flavor, of best quality for both table and wine.

Worden. Black. Bunch large, sometimes shouldered, compact; berries very large, skin thin. Superior to the Concord in the following points: It is better in quality, has a larger berry, a more compact and handsome cluster and ripens five to ten days earlier.

Niagara White Grapes

Niagara White. Occupies the same position among the white varieties as Concord among the black; the leading profitable market sort. Bunch and berries large, greenish white changing to pale yellow when fully ripe. Skin thin but tough; quality much like Concord.

Diamond White. The leading early white grape, ripening before Moore's Early. White, with rich yellow tinge; juicy, few seeds, almost free from pulp, excellent quality; above medium size, adheres firmly to stem. Vine like Concord in growth, hardiness and foliage. Fine variety for both market and home garden.

Chas. A. Green White. Claimed by the introducer to be a new and valuable variety, a vigorous grower and an enormous yielder of very large and beautiful clusters of excellent fruit.

Moore's Early Black. Bunch large, berry large round with heavy bloom, vine exceedingly hardy. Its earliness makes it desirable for an early market. Its hardiness particularly adapts it to Canada and northern portions of the United States; succeeds admirably in the south.

Worden Best Black Grape.

Grape Vines at a Bargain

12 Strong 2-Year Vines for 98 Cents
We offer 3 Worden, black; 3 Concord, black;
1 Campbell's Early, black; 2 Charles A.
Green, white, 3 Niagara, white; all 2-year-
old first-class grape vines for 98 cents,
regular price being \$1.45.

Select Varieties of Gooseberries

Downing
Gooseberry,
the largest
and best
American
Variety

Downing Gooseberry is the largest and best of all native American varieties; see illustration above; This valuable variety originated with Charles Downing, greatest of all pomologists. The value of Downing lies in its large size, fine quality, beautiful appearance, vigorous growth, and freedom from mildew. This variety is recommended as proof against mildew. Downing is free from spines, of a transparent color, tending to yellow; bush upright, keeping the fruit from the sand. Downing is enormously productive. Surely planters of gooseberries have overlooked the great value of the Downing. It is easily harvested by stripping the branches with a gloved hand, enabling the picker to gather many bushels in a day. The winnowing of leaves is done by an ordinary fanning mill, the same as beans. A patron, seven miles south of Lake Ontario, writes that he sold $9\frac{1}{2}$ tons of Downing Gooseberries at \$12.00 per ton, from $2\frac{1}{2}$ acres.

Josselyn. (Red Jacket.) An American seedling of large size; smooth, prolific and hardy; of best quality. Has been well tested over a wide extent of territory by the side of all the leading varieties, and has been found, so far, to be the freest from mildew, both in leaf and fruit, of them all. A wonderful cropper, with bright, clean, healthy foliage.

Smith's. (Smith's Improved.) Bush moderately vigorous and exceedingly productive. Fruit large, pale greenish yellow, moderately firm and sweet.

Chautauqua. Bush very vigorous, stout, upright; foliage large, glossy, dark green. Fruit large, smooth, veined, translucent; skin thick; quality very sweet and high-flavored.

Columbus. Bush a strong, robust grower; foliage large and glossy. Fruit large, oval; skin greenish yellow, smooth; of the highest quality.

Houghton. Bush a vigorous grower; with rather slender branches; very productive. Fruit medium size, pale red, tender and good.

Price for all varieties of Gooseberries named above, 2 year bushes, 15 cents each, 10 for \$1.25, 100 for \$10.00, 1000 for \$90.00.

Industry Gooseberry

Industry Gooseberry. An English variety which is being largely planted in this country. The Industry is marvelously productive and bears second, if not the first year planted. It is very popular in England. One grower there picked 6,300 pounds of this variety from half an acre, realizing \$187.50. Had this crop been offered on the market in this country the amount realized would have been more. The fruit is of large size; color dark red. When making out your order for gooseberries, do not overlook the fact that the Industry is a variety of large size, also that there is no risk to run in planting it, as it has been thoroughly tested in nearly every state in the country, and is much liked everywhere.

Price of Industry Gooseberries, 2 year bushes, 25 cents each, 10 for \$2.00, 100 for \$17.00.

The Gooseberry should be planted in good, rich soil, and given a liberal dressing of manure every season. Plant in rows 6 feet apart, and 4 feet apart in rows, or, if to be cultivated both ways, 5 feet apart each way.

SELECT VARIETIES OF BLACKBERRIES

Blackberries for garden culture, plant 4 feet apart in rows 5 feet apart. For field culture plant 3 feet apart in rows 6 feet apart. Pinch back canes when 3 or 4 feet high, and allow but three canes to the hill. Give about same treatment as raspberries. Blackberries should be picked when a full, glossy black. Berries that have become dull-looking are too ripe for marketing. Blackberries should not be picked when moist, either after rain or heavy dew. The moisture causes development of mould and results in decay. The method of gathering this fruit differs from that of harvesting strawberries, in that the stems should not be left on, otherwise the operation is practically the same. Berries should be carefully picked and not left standing in the sun before being placed in the standard strawberry crate.

Mersereau. Remarkably strong grower, upright, producing stout, stocky canes. Claimed to be the hardest Blackberry, standing uninjured 20° below zero without protection. An enormous producer of extra size berries, which are brilliant black and retain color; extra quality; sweet, rich and melting, without core. Ripens very early.

Minniewaska. This wonderful, hardy, productive, good blackberry has not been forgotten by us, or our old patrons. Its principal points are hardiness, excellent quality, earliness, and continued bearing and productiveness. The secret of its great productiveness is that it is an enormous grower. A large grower near Rochester states that his average receipts from blackberries has been \$300

per acre of Minniewaska per year for the past five years.

Lawton. Large, oblong-oval, black, soft and sweet when fully ripe. The second variety introduced into cultivation; very productive and hardy; one of the best market varieties. On a plot of one-fifth acre we picked 350 quarts, a fairly good yield considering that this is but the second crop picked. One of the hardest Blackberries, free from rust.

Snyder. Extremely hardy, enormously productive, medium size, no hard, sour core; sweet and juicy. The leading variety where hardiness is the consideration. Ripens early.

Blower. Originated in the celebrated small fruit belt of Chautauqua County, N. Y., where it has been thoroughly tested for several seasons. Claimed to be the hardiest, most productive, the finest quality and to bring on the market the highest price of all blackberries. Has produced 2694 berries on one bush, 2720 quarts on one-third acre. Large size, jet black, good shipper, best quality, unexcelled productiveness are the main characteristics of this splendid new sort.

Erie. One of the hardy varieties, as vigorous as Kittatinny; very productive; foliage clean and healthy; free from rust; fruit large, about the size of Lawton, round in form, giving the appearance of being even larger than it really is; good quality, ripens between Early Harvest and Wilson Junior.

Kittatinny. One of the popular old varieties. Fruit of best quality, large, handsome, ripe as soon as black. Canes erect, strong and vigorous growers, very productive.

Eldorado. The vines are very hardy and vigorous, enduring the winters of the far Northwest without injury, and their yield is enormous. The berries are large, jet black, borne in large clusters and ripen well together; they are very sweet, melting, have no hard core and keep for eight or ten days after picking with quality unimpaired.

Rathbun. A strong, erect grower with strong stem branching freely; will root from tip of branches like a raspberry. Forms a neat compact bush four to five feet high, producing its immense fruit abundantly. Fruit is sweet and luscious without hard core, of extra high flavor, jet black, small seeds; firm enough to ship and handle well. Very large size, resembling the Wilson and fully equal to that grand variety.

Price of all varieties of Blackberries, strong, well-rooted plants, 3 for 25 cents, 10 for 75 cents. 100 for \$2.50, 1000 for \$20.00.

SELECT VARIETIES OF STRAWBERRIES

✓ **Senator Dunlap.** A well tested, early variety, one of the safe sorts to plant everywhere. Fruit good size, regular form, beautiful bright red, glossy, firm, splendid keeper and shipper, excellent quality, one of the best for canning.

✓ **Marshall.** An exceedingly handsome, high colored, very large berry of extra fine quality; ripening early. Plant very strong, with high culture produces heavy crops. The best early large variety.

Sample. (Imp.) Late. Of large size and yields enormous quantities of berries of excellent quality of bright red color, very firm and of rich flavor. A standard shipping variety.

✓ **Michel's Early.** Very productive; berries medium size, roundish, bright crimson, fair quality.

✓ **Jessie. (Per.)** A perfect strawberry for those having only a garden spot, very productive, fruit large and of fine quality.

✓ **Senator Dunlap, Early and Productive**

Corsican is a great strawberry for many reasons. First, it is the biggest berry; second, it is the brightest and best in color; third, it is a great yielder and producer; fourth, and the most important of all, the foliage is exceedingly vigorous and leathery, resisting fungus, drought, weeds, and even neglect of cultivation. Plantations of Corsican continue in bearing longer than any other variety we have.

✓ **Corsican Big Strawberry**

✓ **Brandywine.** A very late and firm berry; a good shipper, good canner, a good all round strawberry. Season medium to very late.

✓ **Glen Mary.** Large, productive, firm and good. It is the best berry for large size, good quality and productiveness.

✓ **McKinley. (Per.)** Medium to late. Fruit large and firm, of round, conical shape and bright red color which extends clear through the meat. Always attractive and of highest quality. On rich loamy soil the fruit is very large, $5\frac{1}{2}$ pounds of fruit were grown from twelve plants of the McKinley strawberry.

NOTE: Do not order strawberry plants sent by freight. Oftentimes our friends order from 50 to 500 trees, and 500 or more strawberry plants by freight. Now the trees should go by freight and the strawberries by express, or small lots by mail. In all cases when desired by mail, add postage at rate of 20c. per 100. Always state plainly that the strawberry plants are to be sent by express or mail.

Price for all varieties of strawberries named above, extra strong plants, (by express) 10 for 20 cents, 100 for 75 cents, 1900 for \$6.00.

Maloney Bros. & Wells Co., Dansville, N. Y.

Gentlemen: The trees arrived all right and in good condition. They are very nice stock. I thank you very much and will get up a larger order for you next spring.

Lower Providence, Pa., Dec. 7, 1911.

Very truly yours, DR. M. Y. WEBER

SELECT VARIETIES OF ROSES

Margaret Dickson

Margaret Dickson. New, perfectly hardy and very vigorous. A free summer and autumn bloomer. Flowers white with pale flesh center, of a waxy texture and delightful fragrance.

Clio. New. The perfection in Hybrid Perpetuals. Of delicate satin blush with a little deeper center. Large, well shaped and very double. Strong, robust, hardy and prolific. A jewel.

Blanche Robert. Pure white, large and full, buds very beautiful. A strong grower and a desirable variety.

Magna Charta

The following list of Roses are all hardy, and yet a slight protection in exposed situations is desirable. They all bloom profusely in June and more or less through the summer. Fertilize and prune freely.

Alfred Colomb. Very large and full. Brilliant carmine crimson; extremely fragrant. A free grower.

American Beauty. Very large and double. Of globular shape. Deep pink, shaded with carmine. Fragrance exquisite.

Anne de Diesbach. Very large, brilliant crimson; fragrant, vigorous.

Mad. Plantier. Pure white, large and very double. A free bloomer and grower.

Paul Neyron

Paul Neyron. The largest of all. Deep rose color. A free bloomer and vigorous grower.

Marshall P. Wilder. Bright cherry carmine; very fragrant and one of the freest bloomers; Vigorous.

Baron de Bonstetten. Flowers large and very double; color rich, dark red, passing to deep velvety maroon. Very fragrant.

La France. Rich satiny peach, changing to deep rose; large and full. A constant bloomer. The sweetest of all.

Mrs. Laing. Very free flowering; commences early and continues to bloom profusely until fall. Of delicate pink color. Very fragrant.

Magna Charta. Pink and carmine; very large and full; a profuse bloomer. Fragrant. Free grower.

Price for all varieties of Roses, strong 2 year bushes, 20 cents each, 10 for \$1.75, 100 for \$17.00.

Crimson Rambler

Crimson Rambler. New. Of Japan origin. Very vigorous, growing eight to ten feet a season after it is well established. Entirely hardy and extremely prolific. It blooms in clusters. Of a beautiful crimson color and lasts a long time. It is a jewel.

Baltimore Bell. Pale blush, nearly white. Blooms in clusters.

Prairie Queen. Bright, rosy red. Very large and fine.

Baby Rambler. A dwarf (bush) form of Crimson Rambler, and furthermore, Everblooming. Will bloom continuously throughout the summer if planted out-of-doors.

Dorothy Perkins. A most valuable Pink Rambler Rose. Of a most beautiful shell-pink color. In hardiness, nothing more could be desired. Flowers are very double, of large size, usually two inches across and borne in loose clusters. The petals are very prettily rolled back and crinkled; the buds are remarkably handsome, being pointed in shape and of just right size for the buttonhole.

Coquette des Alps. White, slightly shaded with carmine; strong grower and a great favorite. This variety is very valuable; it continues to give a profusion of blossoms for weeks after general varieties have finished.

John Hopper. A beautiful dark pink.

Salet Moss. A vigorous grower and perpetual bloomer, color light rose, the best of its class.

Coquette des Blanches. Fine form; pure white.

Prince Camile de Rohan. Very dark velvety crimson, changing to intense maroon.

Jules Margottin. Bright cherry-red; large, well formed, fragrant flowers; very double and free.

General Jacqueminot

General Jacqueminot. Brilliant crimson; large and fine. Beautiful in bud and a universal favorite.

Frau Karl Druschki (Snow Queen). A new rose of great merit. There is nothing in white roses quite as fine as this. Pure white, large and of elegant form. The bush is vigorous and healthy, with bright, robust and abundant foliage. Perfectly hardy and very prolific.

A Word of Advice About Planting

A Rose delights in an open, airy situation, unshaded by trees or buildings. All the types are very partial to clay loam, but will do very well in any ordinary soil if enriched with well-rotted barnyard manure. Dig the soil up thoroughly to the depth of 12 or 15 inches, as Rose roots penetrate deeply.

Price for all varieties of Roses, strong 2 year bushes, 20 cents each, 10 for \$1.75, 100 for \$17.00.

SELECT VARIETIES OF ORNAMENTAL TREES

American Elm, the most famous of all American Trees.

American Elm. The most admired of all American trees. A natural spreading and drooping tree of our own American meadows and forests, spoken of by many as the most beautiful of all American trees. It is very attractive in any suitable location, is entirely hardy and easily transplanted. There are more Elm trees planted along our streets and highways than any other one variety. This is on account of its dense green foliage, which spreads out from overhead, covering a suitable space of ground in proportion to the size of the tree, which makes it the finest shade tree in the world.

Price of American Elm trees, 8 to 10 feet 50c each, 10 for \$4.50. 6 to 8 feet, 40c each, 10 for \$3.50.

Wier's Cut-Leaved Maple. One of the most remarkable and beautiful trees, with cut or dissected foliage. Its growth is rapid, shoots slender and drooping, as graceful as cut-leaved Birch.

Price of Wier's Cut-Leaved Maple trees, 8 to 10 ft., 60c. each. 6 to 8 feet, 50c. each, 10 for \$4.50.

Maple, Ash-Leaved (Box Elder.) A fine, rapid-growing variety, with handsome, light green foliage and spreading head; very hardy; desirable for street planting and succeeds in many sections where other varieties do not thrive.

Price of Ash Leaved Maple trees, 8 to 10 feet, 35c each, 10 for \$3.00. 6 to 8 feet, 30c each, 10 for \$2.75.

Norway Maple. This is one of the hardiest ornamental shade trees, and one of the most beautiful. It makes more of a wide spreading tree than the sugar maple.

Price of Norway trees, 8 to 10 feet, 75c each, 10 for \$7.00. 6 to 8 feet, 50c each, 10 for \$4.50.

Sugar or Rock Maple. This native tree of ours is a universal favorite for street planting, and desirable everywhere. It is considered a slow grower, but is long-lived.

Price of Sugar Maple Trees 8 to 10 ft., 60c each 10 for \$5.00. 6 to 8 ft., 50c each, 10 for \$4.50.

Maple, Silver Leaved or Soft. Foliage bright green above and silvery underneath. An exceedingly rapid grower. Makes a large tree. A very satisfactory tree to plant in large quantities.

Price of Silver Leaved Maple, 8 to 10 feet, 50c each, 10 for \$4.50. 6 to 8 feet 35c each, 10 for \$3.00.

Carolina Poplar

Thorn, Double Pink. Double pink or rose flowers, with white tips. Price for first class **Trees 3 to 4 feet, 35 cents each, 10 for \$3.25.**

American Linden or Basswood. A rapid growing, large-sized, beautiful native tree, with very large leaves and fragrant flowers.

Price of American Linden trees, 6 to 8 feet, 50 cents each, 10 for \$4.50.

Horse Chestnut, White Flowering. The well-known European species; very handsome; has magnificent spikes of white flowers. As a lawn tree or for the street it has no superior. Price for **Trees 4 to 5 feet, 45 cents each, 10 for \$3.50.**

Purple Leaf Beech. The blood-leaved tree possesses all the qualifications of an ordinary beech, and in addition has beautiful red leaves.

Price of Purple Beech trees, 3 feet high, 50 cents each, 10 for \$4.50.

Catalpa, Bungei. (Umbrella Catalpa.) Grafted on stems 6 to 8 feet high, it makes an umbrella-shaped top without pruning. Perfectly hardy, and flourishes in almost all soils and climates. Leaves large, glossy, heart-shaped, deep green; lie like shingles on a roof; always making a symmetrical head. One of the most unique trees; desirable for lawn, park and cemetery planting.

Price of Trees 6 to 8 ft. \$1.00 each, 10 for \$8.50.

Catalpa, Speciosa. One of the most rapid growers. Valuable for timber, fence posts, railroad ties, etc., possessing wonderful durability. Large, heart-shaped, downy leaves, and compound panicles of white flowers, tinged with violet and dotted with purple and yellow. Very ornamental and useful. Price for first class

Trees 6 to 8 feet, 50 cents each, 10 for \$4.50.

New Large Leaved Carolina Poplar

This tree takes front rank among the best of poplars. It is one of the most rapid growers among shade trees, frequently growing eight feet during one season and thus making fine shade in two or three years. Its branches spread enough to give it a symmetrical, commanding form of elegant appearance. It is very desirable when planted at the roadside, in parks or along rivers and streams. It has an advantage over other shade trees because it will grow in any kind of soil. It is easily transplanted, and gives dense shade in a short time. For a quick grown shade tree there is no tree that equals the Carolina Poplar. It is also very largely planted as a screen to shut out unattractive buildings.

Bargain Prices for Carolina Poplar trees :
10 to 12 feet high, 20 cents each, 10 for \$1.75, 100 for \$15.00.
8 to 10 feet high, 15 cents each, 10 for \$1.35, 100 for \$ 9.00.
6 to 8 feet high, 10 cents each, 10 for 80 cents, 100 for \$6.50.

Franklinville, N. Y., Nov. 1st, 1910.
Maloney Bros. & Wells, Dansville, N. Y.

Gentlemen:—The Poplar trees arrived this morning and look good to me. They are *better trees than the ones I have paid 65 cents each for.*

Very truly yours, Geo. F. Fries.

Thorn, Paul's Double Scarlet. Flowers deep crimson, with scarlet shade; very double. Price of **Trees 3 to 4 feet, 35 cents each, 10 for \$3.25.**

Thorn, Double White. Small, double, daisy-like flowers in clusters. Price for first class **Trees 3 to 4 feet, 35 cents each, 10 for \$3.25.**

Large Flowering Catalpa Speciosa

Ornamental Trees

Cut-Leaved Weeping Birch. This noble tree is not only the most popular of the weeping trees, but it is decidedly the best. Its tall, slender, yet vigorous growth, graceful branches, silvery white bark, and delicately cut foliage, present a combination of attractive characteristics rarely met with in a single tree.

Price of Cut-Leaved Weeping Birch, 5 to 6 feet trees, 45c. each, 10 for \$3.50.

Teas' Weeping Mulberry. The most graceful and hardy weeping tree in existence. Forms a perfect shaped head, with long, slender, willowy branches, drooping to the ground. In light, airy gracefulness, delicacy of form and motion it is without a rival. It has beautiful foliage, is hardy, safe, and easy to transplant. Admirably adapted for small or large grounds, or for cemetery planting.

Price of Teas' Weeping Mulberry, 4 to 5 ft., \$1.25 each, 10 for \$10.00.

Select Varieties of Flowering Shrubs

The judicious planting of shrubs adds greatly to the beauty and value of property, and contributes a wealth of pleasure and interest to the home. There are a few principles governing the artistic arrangement of these beautiful ornamentals that should be more strictly observed. In general, individual specimens should rarely be isolated from the body of the design. Irregular groups or masses arranged against the buildings, fences or property lines, or as border plantations along walks or drives, are much more effective. A good arrangement of shrubs invariably provides wide open stretches near the center of the lawn.

We have reduced our shrub list somewhat, omitting varieties for which, although very desirable in themselves, there is little demand. We shall be glad to correspond with you about any other varieties you may desire.

Purple Fringe

Purple Fringe. (Smoke Tree.) A hardy, large-growing shrub that is very greatly admired for its curious fringe or hair-like flowers that completely cover the bush in mid summer.

Price of strong 2 to 3 feet plants, 25c. each, 10 for \$2.00.

White Fringe. A popular and much admired shrub of moderate growth and rounded form, with large, dark green, glossy leaves, and long drooping panicles of beautiful white fringe-like flowers.

Price of White Fringe, strong plants, 35c. each, 10 for \$3.25.

Russian Mulberry. Very hardy, vigorous grower, very productive, fruit black and of medium size.

Price of Russian Mulberry Trees, 6 to 8 feet high, 25 cents each, 10 for \$2.00.

The *Spiræas* are all elegant low shrubs of easiest culture, and their blooming extends over a period of three months.

Spiræa, Billardi. A hardy, free growing shrub. During July every branch and twig is tipped with a spike of beautiful blood-red flowers 4 to 6 inches in length. A distinctive and beautiful flower and shrub.

Spiræa Anthony Waterer. A beautiful dwarf shrub that throughout the season continuously yields an abundance of rich crimson flowers. Two feet when fully grown.

Spiræa Callosa Alba. A white flowering variety, of dwarf habit; very fine.

Spiræa Douglassi. Has spikes of beautiful, rose-colored flowers in July and August.

Spiræa Callosa Rosea. Has large panicles of deep, rosy blossoms. Grows freely and blooms nearly all summer; fine.

Spiræa Van Houttei. "The grandest of all the *spiræas*. It is a beautiful ornament for the lawn at any season, but when in flower it is a complete fountain of white bloom, the foliage hardly showing. Clusters of twenty to thirty flat white florets make up the raceme, and these clusters are set close along the drooping stems. Perfectly hardy and an early bloomer."

A Bush of *Spiræa Van Houttei* in Full Bloom

Lilac, Purple. The well-known variety, one of the best. A good grower; flowers and young wood fragrant; purple.

Barberry, Purple Leaved. A very effective bush to use in color schemes, because of the violet purple and foliage fruit. Very thorny; also makes a suitable hedge.

Snowball Bush

Snowball, Common. A popular shrub. Makes a large bush. Bears balls of pure white flowers. Has very rich deep green foliage. A very desirable shrub.

Lilac, White. A very desirable contrast to the purple; those who have one should have the other.

Special Price for all varieties of Flowering Shrubs named above, Large Size, 20 cents each, 10 for \$1.80, 100 for \$15.00.

Golden Leaved Elder in Bloom

Golden-Leaved Elder. The best of all the colored shrubs. A plant of this bush in a bed, or a border, or on the lawn, is a conspicuous feature, the foliage being as yellow as gold.

Althea Shrub in Bloom

Weigelas. A group of very beautiful shrubs easily grown and always in demand. Entirely hardy, profuse bloomers.

Weigela, Candida. The flowers are of the purest white, blooming in June, and all summer. Hardy.

Weigela, Eva Rathke. With showy, bright red flowers borne freely during the summer.

Weigela, Floribunda. The flowers are dark crimson, with white stamens somewhat like Fuchsia flowers. It blooms in the spring and in the fall.

Weigela Rosea. This is one of the most charming shrubs in cultivation; it cannot be too highly recommended; the flowers are large and of a deep rosy color, and are born in great profusion.

Mock Orange. Flowers white, deliciously perfumed. Derives its name owing to flowers resembling orange blossoms; a delightful substitute for that noble flower.

Hydrangea, Paniculata Grandiflora. Absolutely hardy; thrives in all soils; grows rapidly and blossoms profusely. The flowers are pure white, afterward changing to pink, and are borne in large pyramidal trusses often more than a foot long and six to eight inches in diameter. Begins to bloom early in August, and continues to bloom for several weeks. Wherever known it is considered to be one of the finest flowering shrubs cultivated. It is equally valuable for planting singly or massing in beds. We heartily commend it to all lovers of the beautiful. Attains a height of from 3 to 5 feet. Requires annual and severe pruning to obtain best results.

Althea. A large shrub, sometimes trimmed into tree form, that blooms freely in August or September, when almost every tree is out of bloom. Vigorous grower and succeeds everywhere. Also called Rose of Sharon. We can furnish double varieties in these colors; Althea Double Purple, Red, Pink and White.

Althea Variegated. Leaves bright green, broadly margined with light yellow; very showy.

Honeysuckle. The shrubby Honeysuckle have bright and pretty fragrant flowers, followed by showy berries that last much longer. All are of neat, attractive habit and grow well in ordinary soils.

Red Tartarian Honeysuckle. Highly esteemed for its fragrant rose-colored flowers in May, and beautiful orange-colored berries.

White Tartarian Honeysuckle. Differs only in the color of the flowers.

Quince, Japan. Bears a profusion of bright scarlet crimson flowers before the leaves appear. Makes a lovely hedge and can be trimmed to any shape desired.

Prunus Pissardi, Purple-leaved Plum. Foliage of a bright purplish red, remaining so all through the season. Entirely hardy. One of the most valuable hardy foliage shrubs on the list.

Prunus Triloba, (Double Flowering Plum) Blooms much like flowering Almond, but earlier and larger, of a delicate pink color. Hardy and exceedingly handsome.

The Bush Hydrangea (Paniculata Grandiflora)

Special price for all varieties of Flowering Shrubs named above, large size, 20 cents each, 10 for \$1.80, 100 for \$15.00.

Deutzia, Pride of Rochester

Deutzia, Pride of Rochester. Blooms in May. Double white, tinted with rose on the edge.

Deutzia, Crenata, Double-Flowering. A hardy, vigorous shrub that does not suffer from insects or diseases and early in the season is fairly covered with very showy double white flowers that on the edge are slightly tinged with rose. Handsome, desirable shrub.

Deutzia, Gracilis. Pure white flowers in June. Two feet high when fully grown.

Deutzia, Lemoinei. Dwarf, the flowers are large, pure white and produced freely.

Special Price for all varieties of Deutzia named above: Large Size, 20 cents each, 10 for \$1.80, 100 for \$15.00.

California Privet. A vigorous-growing variety, of fine habit, thick, glossy, nearly evergreen leaves. Of all ornamental hedge-plants this is the most highly prized. If cut to the ground one or two years after planting, it makes a very thick hedge right from the bottom, sending up many strong shoots. The leaves

are a rich green, and will remain on the plants up to Christmas, and if they are a little sheltered they will keep green almost all winter. This is especially the case if the hedge has attained some age and has frequently been trimmed. Though it is a very strong grower, it can be kept to a low size by frequent trimming. Where a close, compact hedge is desired we recommend California Privet. Should be planted about eight to ten inches apart to give best results.

California Privet Adds Beauty and Value to the Home Grounds

Price of California Privet strong plants:

18 to 24 inches high, 7 cents each, 10 for 50 cents, 100 for \$3.50, 1000 for \$30.00.
24 to 30 inches high, 10 cents each, 10 for 75 cents, 100 for \$5.00, 1000 for \$45.00.

Norway Spruce.

There is no evergreen so largely planted as the Norway Spruce. It is indeed a tree possessed with great beauty at all seasons of the year, but particularly in winter when its branches are weighed down with newly fallen snow. This spruce is a rapid grower and is often used as a lawn fence between village or city lots. Norway Spruce can be planted most effectively in groups on the lawn, imitating nature, planting without any particular order, but far enough apart to give each tree an opportunity to expand itself in its beauty.

Barberry Thunbergii. A pretty plant of dwarf habit from Japan. Very graceful and its foliage turns to a beautiful red in the fall. All Barberries make very fine hedges.

Price of Norway Spruce and Barberry:

18 to 24 inches, 15 cents each, 10 for \$1.35, 100 for \$12.00.

2 to 3 feet, 25 cents each, 10 for \$2.25, 100 for \$20.00.

Clematis, the Queen of Climbing Plants

Henryii Clematis

Henryii Clematis. A vigorous grower and a free bloomer, producing its large pure white flowers constantly during the summer and early autumn. The best large-flowered variety producing pure white flowers.

Price for strong 2 year plants, 50 cents each, 10 for \$4.50.

There is no more ornamental class of plants than the Clematis, and the rich show of bloom produced by the best varieties is far too magnificent to be fairly portrayed by mere words. The flowers are of large size, measuring five to six inches in diameter. We presume every one of our customers who sees Clematis plants in bloom each summer promises to plant some in his own garden at the next opportunity. They are especially adapted to open lawns or house fronts in the city or country. Perfectly hardy, bearing beautiful and lasting flowers. The varieties we offer are the best out of a large assortment.

Jackmanni Clematis. The flowers are large, intense, rich, velvety violet-purple, and are produced in such masses as to form a cloud of bloom. This is the best known Clematis, and should have credit of the great popularity now attending this family of beautiful climbers. Though originated in 1862, since which time many new varieties have been raised and introduced, the Jackmanni has no superior and few equals.

Price for strong 2 year plants, 50 cents each, 10 for \$4.60.

Paniculata Clematis. (Sweet-scented Japan Clematis.) Of very rapid growth, quickly covering trellises and arbors with handsome, clean, glossy foliage. The flowers are of medium size, fragrant, pure white, borne in immense sheets in September, when very few other vines are in bloom.

Price of strong 2 year plants, 35 cents each, 10 for \$3.00.

Climbing Vines are Used to Great Advantage in Many Ways

Ampelopsis Veitchi. (Boston Ivy.) This is one of the finest climbers we have for covering walls, as it clings firmly to the smoothest surface, covering it closely with overlapping foliage, giving it the appearance of being shingled with green leaves. The color is a fresh, deep green in summer, changing to the brightest shades of crimson and yellow in autumn. It is hardy, and becomes more popular every year.

Price of strong 2 yr. plants, 35c each, 10 for \$3.00.

Dutchman's Pipe. Brownish flowers, resembling a miniature pipe; splendid for archways or verandas.

Price of strong 2 yr. plants, 50c each, 10 for \$4.50.

Halleana. (Hall's Japan Honeysuckle.) An almost evergreen honeysuckle of the greatest value, being hardy and of strong growth. The flowers are fragrant, of a pure white, changing to yellow.

Price of strong 2 year plants, 25 cents each, 10 for \$2.00.

Trumpet Vine. A robust, woody vine; twining tightly with numerous roots along its stems. Its orange scarlet, trumpet-shaped flowers cluster at the tip of the branches. Plant in a sunny spot in good garden soil, dug very deep, placing the crown of the roots $\frac{3}{4}$ inch below the surface of the soil.

Price of strong 2 year plants, 25 cents each, 10 for \$2.00.

Buying Choice Trees and Plants By Mail

It is easier to buy by mail than to go to a store. In many instances it is possible to buy a better quality of trees and plants by mail than can be procured in other ways.

The greater portion of our business is transacted through the mails. The planter in California can purchase with as great an assurance of satisfaction as if he personally selected his trees and plants.

Trees and Plants ordered are personally selected. One from our office, who has spent an entire lifetime in the business, carefully selects the trees and plants and follows instructions closely.

Our method of packing enables us to ship to remote sections with great success. We believe that we give more attention to digging and packing than is customary.

Our Mail Order Trees and Plants are flourishing in localities where the smoke of the railroad engine is never seen, and at other distant points where railroad charges would deter you from ordering.

Varieties of Trees and Plants—By Mail Postpaid at Prices Attached

80,000 Apple Trees. By mail. Especially for this season's mailing we have grown an extra fine block of one-year-old trees. Such trees that every buyer will be pleased with. The varieties are: Northern Spy, Yellow Transparent, Wealthy, Baldwin, York Imperial, Duchess, Wagener, King, Jonathan, Ben Davis, and Transcendent Crab

We have by a special method grown some mailing size trees of a few varieties as follows: Bartlett, Keiffer, Clapp's Favorite, Seckel, Flemish Beauty and Keiffer.

Price of all varieties of mailing size Pear Trees, 25c. each, 10 for \$2.25.

Plum Trees By Mail

Plum trees generally grow so heavy at 1-year old that it is impossible to get mailing size trees, but we have some nice trees, strong, heavy rooted, two feet high, Geuii, Abundance, Burbank, Climax, Red June, Wickson, Thanksgiving, Lombard, Bradshaw and Niagara.

Price of mailing size Plum Trees, 25 cents each, 10 for \$2.25.

Sweet Cherry Trees of Mailing Size

We have but three varieties; Black Tartarian, Windsor and Napoleon.

Price of Sweet Cherry Trees, mailing size, 35 cents each, 10 for \$3.00.

Quince Trees By Mail

We offer three varieties of mailing size quince trees: Orange, Bourgeat and Champion. Very strong, heavily rooted, 18 to 20 inches high.

Price of Quince Trees, 25 cents each, 10 for \$2.25.

Maloney Bros. & Wells, Dansville, N. Y.

Gentlemen:—The trees have been received, in fine condition, and all as fine trees as I ever saw. You will get my orders in the future.

Very truly yours, Dr. B. J. Wetherby.

Pittston, Pa., April 25, 1910.

TREES AND PLANTS BY MAIL POST PAID

Currant Bushes by Mail

Currants are perfectly hardy and may be planted in fall or spring. We offer only the best varieties.

Fay's Prolific Currant. The leading market variety. Extra long stems and large berries.

Perfection Currant. In color it is a beautiful, bright red, and of a size larger than the Fay.

Cherry Currant. Very large berries on short clusters; a robust, fruitful sort.

Red Cross Currant is an exception to the ordinary rule, being the sweetest currant ever produced.

Wilder Currant. Red, with large, fine-flavored fruit of a bright, attractive color. Few varieties equal it in productiveness and long-keeping.

Black Champion Currant. Produces large crops of excellent fruit.

White Grape Currant. The best white.

Price for all varieties of Currants named above, strong 2 yr. bushes, 10c each, 10 for \$1.00 postp'd.

Raspberries. We have only the best red varieties to offer for Spring as follows:

Loudon. The hardiest, most productive and best market red raspberry, superior quality.

Price of Loudon Raspberry, 6c each, 10 for 50c, 100 for \$2.25.

Cuthbert. The greatest market red raspberry, good grower with healthy foliage, fruit very firm.

Price of Cuthbert Raspberry, 5c each, 10 for 35c, 100 for \$1.25.

Blackberries by Mail

Snyder. Berries of medium size, sweet, melting. Very hardy and wonderfully productive.

Minnewaska. Berries large, juicy, sweet. Remarkably productive and hardy.

Eldorado. The canes are very hardy and vigorous; the berries are large, jet-black, very sweet.

Price for all varieties of Blackberries named above, 10c each, 10 for 50c, 100 for \$2.50, postpaid.

Strawberry Plants are especially adapted to mailing, for they bear transmission well, and our experience is something to be considered. Strawberry plants usually produce some fruit the first season planted. We offer the following selected varieties:

Corsican (Big berry) You can make no mistake in this variety.

Brandywine. A very late and firm berry, a good shipper.

Glen Mary One of the best varieties, large and productive.

Senator Dunlap. Early, an all round, rough and ready producer.

One of our Mailing Size Strawberry Plants

Price for all varieties of strawberries, 10 for 25c, 100 for 1.25.

Grape Vines by Mail

Worden. A splendid black grape.

Moore's Early (Black) Bunch and berry large, round with heavy blue bloom.

Concord. Bunch large, compact, berries large.

Brighton. The best red grape in cultivation.

Diamond. Leading early white grape.

Niagara. Occupies the same position among white varieties as Concord among black.

Price for all varieties of Grapes named above, strong 2 year vines, 15c each, 10 for \$1.25, postpaid.

Gooseberries by Mail

Chautauqua Gooseberry. Berries of the largest size, pale yellow, of finest flavor.

Red Jacket Gooseberry. Large, smooth, of good flavor; the bush very hardy.

Downing. A large and handsome pale green berry of splendid quality for dessert or cooking.

Price of Gooseberries named above, strong 2 year bushes, 15c each, 10 for \$1.45.

Industry Gooseberry. Fruit large, oval, dark red, hairy; beautiful and of the best quality.

Price of Industry, strong 2 year bushes, 25c each, 10 for \$2.35, postpaid.

The largest share of our business is from customers whom we never see—customers who order by mail from our catalogue. A patron from California wrote a few days ago: "Your prices are 50 per cent less than local prices here. Your fairness and courtesy make it a pleasure to deal with you."

Our New Modern Office

goes to the agent himself, for his wages and expenses. This you save by buying direct from us, the growers. If you wish to find the agent who sold to you, you cannot do so, but you can always find us at DANSVILLE, N. Y., where we have been growing trees for twenty-six years.

QUALITY AND PRICES. We do not claim to furnish the cheapest trees in the world, but we do claim that no better or healthier trees are grown anywhere than are produced here by us in this, the Largest Nursery Center in the United States. This season has given us some of the finest blocks of trees we have ever grown, and the quality of our trees cannot be equalled.

TWO MILLION TREES. The immense stock which we grow enables one to select varieties suited to the different soils and climates, and, beside giving our personal attention to all details, we employ a large force of skilled nursery assistants, in addition to exceptional facilities of handling, packing and shipping, which places us in a position to promise our patrons the careful execution of all orders that they may intrust to us. It is our aim and intention to supply only the best stock at the lowest prices, consistent with the quality of the stock offered, and all intending purchasers will find it to their advantage to place their orders with us as early as possible to secure varieties needed.

Plant Better Trees and Save Half of Your Money

If you buy of tree agents or peddlers, more than half of the money you pay them

Superior Roots are the Result of Our Steam Digger

Youngstown, Ohio, Nov. 30, 1910.

Maloney Bros. & Wells Co., Dansville, N. Y.

Gentlemen:—The trees bought of you were the finest that I received from any of the eight different Nurserymen. That is they had much the LONGEST AND BEST ROOTS. They must have been very carefully dug.

Very truly yours, J. F. W. RITTER.

In growing and furnishing all nursery stock we use the greatest care to have it true to name, and will replace any that may prove untrue. But no sale made by us carries a warranty in this respect, express or implied, and for any error we shall not be liable for more than the purchase price. Rejections if any to be made within ten days after stock reaches destination. All agreements and acceptance of orders are made subject to the loss of stock by drought, fire, insects, or any other unavoidable causes. All quotations are made subject to stock being sold on receipt of order. Every purchase from us is made on these terms.

Jersey City, N. J., Nov. 18, 1910.

Maloney Bros. & Wells Co., Dansville, N. Y.

Gentlemen:—I am very much pleased with the trees, a fine healthy lot with EXCELLENT ROOTS and not one was injured in any way nor a limb broken. Your packing is certainly superb.

Very truly yours,

Edw. Hoos.

MALONEY BROS. & WELLS CO., DANSVILLE, N. Y.

Photograph of the New Frost Proof Packing House, Erected by Maloney Bros. & Wells Co., Dansville, N. Y.

The largest and most complete frost proof packing house in western New York, to which we send all trees from the nursery as dug, where they are sorted, packed and shipped direct to our patrons. This building contains 15,600 feet of ground floor space, is lighted by electricity, and connected by a private switch direct from the main line of the Dansville & Mt. Morris Railroad.
